CITY OF DARIEN

PLANNING, ZONING, AND ECONOMIC DEVELOPMENT COMMISSION

Wednesday, March 5, 2025
7:00 PM
Darien Police Department Training Room
1710 Plainfield Road

AGENDA

1) Call to Order

2) Roll Call

3) Regular Meeting – New Business

   a. PZC2024-14
   8226 S. Cass Avenue – True North Energy, LLC
   A petition for an amendment to the Special Use Permit which previously permitted the construction and operation of an automobile service station, drive-through car wash, and mini-mart, to allow for the demolition of the existing car wash and mini-mart, and the relocation/expansion of the mini-mart. The project includes requested variations from the City's landscape requirements. On-site improvements include parking facilities, landscape improvements and drainage/stormwater improvements. The subject property is located in the General Business District B-3 at the northwest corner S. Cass Avenue and N. Frontage Road.

   b. PZC2025-02
   Petition from the City of Darien to amend Title 5A (Zoning Regulations) to add "the offering of a short-term rental" as a prohibited action under the existing short-term rental prohibition contained in Section 5A-5-16 of the City Code**.**

4) Regular Meeting – Old Business

5) Staff Updates & Correspondence

6) Approval of Minutes February 19, 2025

7) Next Meeting March 19, 2025

8) Public Comments [On Any Topic Related to Planning and Zoning]

9) Adjournment

CASE
PZC2024-14 Special Use Amendment, Variations – 8226 S. Cass Avenue

ORDINANCE

ISSUE STATEMENT
Petitioner (True North Energy, LLC) requests an amendment to the Special Use Permit which previously permitted the construction and operation of an automobile service station, drive-through car wash, and mini-mart, to allow for the demolition of the existing car wash and mini-mart, and the relocation/expansion of the mini-mart. The project includes requested variations from the City's landscape requirements. On-site improvements include parking facilities, landscape improvements and drainage/stormwater improvements. The subject property is located in the General Business District B-3 at the northwest corner S. Cass Avenue and N. Frontage Road, commonly known as 8226 S. Cass Avenue.

Applicable Regulations:	Ordinance No. O-31-85 Zoning Section 5A-8-4, B-3 District Standards

GENERAL INFORMATION

Petitioner:	True North Energy, LLC
Property Owner:	True North Energy, LLC
Property Location:	8226 S. Cass Avenue
PIN Number:	09-33-205-036-0000
Existing Zoning:	General Business District (B-3)
Existing Land Use:	Gas Station, Drive-Through Carwash, Mini-Mart
Proposed Land Use:	Gas Station, Mini-Mart
Comprehensive Plan:	Commercial (Existing); Commercial (Future)
Surrounding Zoning & Uses	
North:	Multi Family Residence District (R-3); Townhomes
East:	Neighborhood Convenience Shopping District (B-1) and Multi Family Residence District (R-3); Bank and Apartments
South:	Single Family Residence District (R-1); Our Lady of Mt. Carmel Church
West:	General Business District (B-3); Banquet Hall
Size of Property:	1.64 Acres
Floodplain:	N/A
Natural Features:	Site is fully developed and professionally landscaped with trees, shrubs and groundcover.
Transportation:	The petition site gains access from two driveways off of Cass Avenue and one driveway off of North Frontage Road.

BACKGROUND/OVERVIEW

The 1.64-acre subject property is located at the northwest corner of Cass Avenue and the North Frontage Road intersection (see Attachment 1), within the General Business District (B-3). On October 7, 1985, the City Council adopted Ordinance No. O-31-85 (see Attachment 2), approving a Special Use Permit for the construction of the existing site, which includes automobile service station with a canopy and 10 fuel pumps, a mini-mart approximately 936 square feet in size, and a drive-through carwash (see Attachment 3).

In 2010, the property was purchased from Shell Oil Products US by True North Energy, LLC (the Petitioner), which owns and operates automobile service stations and convenience stores across the Midwest. In the last several years, the Petitioner has reinvested in its branded convenience stores, and as part of that effort, is now requesting to amend the existing Special Use Permit (see Attachment 4) to perform a full tear down and renovation of the property which includes a fuel island and canopy for six pumps, a new convenience store approximately 5,425 square feet in size, and the removal of the carwash. On-site improvements are proposed including a new trash enclosure, pedestrian access, parking and landscape areas, and drainage/stormwater improvements.

ANALYSIS

A) Zoning and Land Use

Existing Zoning and Land Use: The property is currently zoned General Business District (B-3). The site is bordered by Multi Family Residence District (R-3) and townhomes to the north; Neighborhood Convenience Shopping District (B-1) and Multi Family Residence District (R-3) to the east, consisting of a bank and apartments; General Business District (B-3) and a banquet hall to the west; and lastly, Single Family Residence District (R-1) to the south, which consists of the Our Lady of Mt. Carmel Church.

B) Automobile Service Station and Mini-Mart (Special Use Amendment and Variations)

Special Use Permit Amendment: Automobile service stations and carwash facilities are permitted as special uses, per Section 5A-8-3-4 and 5A-8-4-4 of the City's Zoning Ordinance. As the project

involves a change in the land use and site plan, a Special Use Permit Amendment is required.

Site and Architectural Design: The project site (see Attachment 5 – Site Plan, Utility Plan and Grading Plan) is designed with the new 5,425 square foot convenience store in the same approximate location as the previous drive-through carwash, on the west of the property, behind the renovated fuel island and canopy in the center of the site. To the rear of the convenience store and adjacent to the west property line, the existing detention pond will be further excavated and redesigned. Changes to the pond include the construction of a retaining wall along the western property line that will function as the edge of the pond. The wall varies in height from 2-feet to 7-feet tall, with an approximately 2.5 to 3-foot portion of the wall's height being below grade. A landscaped refuse and recycling enclosure is proposed to the south of the convenience store building.

The floor plan and elevations (see Attachment 6) show that the rectangular building utilizes a contemporary commercial design, with a corniced flat roof and a prominent arched entryway. The exterior materials include stucco and stone veneer, while the arched entryway and awnings incorporate a bronze finish. The prominent front elevation uses large aluminum storefront windows and wall sconce lighting, while the rear employs wall-pack security lighting. In addition to the plans, enhanced 3D renderings were provided (see Attachment 7).

Access, Circulation and Parking: Access to the site is provide by two restricted driveways on Cass Avenue (right-in and right-out), and a shared drive aisle that access from North Frontage Road. The existing raised curb/island barrier between the shared drive aisle and the project site will be demolished and the area will consist of open paving. 19 dedicated parking stalls are proposed, along with 12 stalls available at the fuel pumps, with additional unmarked parking surfaces are provided near the perimeter of the site which meets the minimum requirement of 21 parking stalls.

Traffic Study: Cass Avenue right-of-way is under the jurisdiction of DuPage County – however, the petitioner provided a traffic study (see Attachment 8) prepared by Kenig, Lindgren, O'Hara, Aboona, Inc. (KLOA), dated February 25, 2025 to evaluate the potential for transportation impacts resulting from the development of the proposed project. The study analyzed existing conditions without the project, existing conditions plus the project, future traffic conditions, and analyzed the specific roadway and site access existing or included as part of the project. Results indicate that peak hour trips will increase by approximately 1%, and due to the existing capacity, the proposed project is forecast to result in no substantial transportation impacts or degradation in level of service.

Site Plan Review: Staff have reviewed the petitioner submitted plans and found that the project complies with all required development standards, except with regard to perimeter landscaping requirements, as outlined below. The preliminary plans were reviewed and accepted by Christopher B. Burke Engineering's Dan Lynch on January 22, 2025, and the applicant will be required to address the comments in the letter during the plan check process and prior to permit issuance (see Attachment 9).

Variation Request: Based on the site layout and submitted documents, the petitioner is requesting variations from the following sections of the City's Zoning Regulations:

Section 5A-8-4-8(B)(2)	To allow for parking areas near the northern property line to be located within the 30-foot parking setback.
Section 5A-10-6	To allow for no landscape islands to be provided in the parking area directly in front of the mini-mart.
Section 5A-10-5	To allow for less perimeter landscaping than would otherwise be required at the eastern, western, and southern property lines, in lieu of the proposed landscaping.

The City's landscape ordinance is based on a point system. Trees provide the most points, while shrubs and groundcover provide fewer points. The table details the required and proposed landscape points.

Table 1: Landscaping Tabulation

	Required Landscaping	**Proposed Landscaping**
North	1680 pts	1780 pts (complies)
South	1192.5 pts	780 pts (*deficient*)
East	1197 pts	405 pts (*deficient*)
West	1192.5 pts	880 pts (*deficient*)

The proposed landscape plan provides planting details and a breakdown of the landscaping calculations – see Attachment 10.

Justification Letter and Findings of Fact: As previously mentioned, a justification letter for the various findings of fact for the special use amendment and variations have been prepared by the petitioner and are attached to the application as Attachment 11. They generally refer to site constraints and as-built conditions that prevent strict compliance with the required landscaping scores. For reference, the criteria the Planning, Zoning and Economic Development Commission and City Council apply in their actions for Special Uses and Variation requests are included in Attachment 12.

Conditions of Approval: All existing conditions of approval established under Ordinance No. O-31-85 will remain in place, except those regarding carwash operations, and landscaping. Should the petition be approved, the new ordinance would supersede those conditions of approval where necessary. Should the Planning, Zoning and Economic Development Commission recommend approval of this petition, staff recommended adding the following conditions of approval:

1. Plans submitted for the project shall include enhanced landscaping along the northern

property line, to consist of additional shade/overstory trees in areas where no trees are provided.

2. Prior to the issuance of a final certificate of occupancy, the petitioner shall include pavement rehabilitation or resurfacing of those portions of the shared access drive that are located on the subject property that are generally in disrepair, to the satisfaction of the Director of Community Development.

3. Comply with the comments and requirements within the letter from Christopher B. Burke Engineering, Ltd. dated January 22, 2025.

DECISION MODE

The Planning, Zoning and Economic Development Commission will consider this item at is meeting on March 5, 2025.

ORDINANCE NUMBER O-31-85

AN ORDINANCE GRANTING A SPECIAL USE PERMIT FOR CERTAIN PROPERTY WITHIN THE CITY OF DARIEN (KLOSKI/SHELL)

ADOPTED BY THE

MAYOR AND CITY COUNCIL

OF THE

CITY OF DARIEN

THIS 7th DAY OF October, 19 85

Published in pamphlet form by authority of the Mayor and City Council of the City of Darien, DuPage County, Illinois, this 8th day of October, 19 85.

STATE OF ILLINOIS)
) SS
COUNTY OF DU PAGE)

CERTIFICATE

I, Gertrude M. Coit, C.M.C., certify that I am the duly elected and acting municipal clerk of the City of Darien, Du Page County, Illinois.

I further certify that on October 7, 1985, the Corporate Authorities of such municipality passed and approved Ordinance Number 0-31-85, entitled AN ORDINANCE GRANTING A SPECIAL USE PERMIT FOR CERTAIN PROPERTY WITHIN THE CITY OF DARIEN (KLOSKI/SHELL)

which provided by its terms that it should be published in pamphlet form.

The pamphlet form of Ordinance Number 0-31-85, including the Ordinance and a cover sheet thereof was prepared, and a copy of such Ordinance was posted in the municipal building, commencing on October 8, 1985, and continuing for at least ten (10) days thereafter. Copies of such Ordinance were also available for public inspection upon request in the office of the municipal clerk.

DATED at Darien, Illinois, this 8th day of October, 1985.

(SEAL)

Gertrude M. Coit, C.M.C.
Municipal Clerk

JDM/MSP/10/02/85

ORDINANCE NUMBER 0-31-85

AN ORDINANCE GRANTING A SPECIAL USE PERMIT FOR CERTAIN PROPERTY WITHIN THE CITY OF DARIEN (KLOSKI/SHELL)

WHEREAS, the owner and the contract purchaser of the property legally described on Exhibit "A" attached hereto and made a part hereof ("subject property") have filed a petition with the City of Darien for a Special Use Permit to allow the construction and operation of an automobile service station, car wash, and mini-mart facility on the subject property; and,

WHEREAS, pursuant to due and proper legal notice, the Darien Plan Commission conducted a public hearing with respect to said petition on August 28, 1985; and,

WHEREAS, the Plan Commission has forwarded its report and recommendation to the City Council; and,

WHEREAS, following review of the Plan Commission's report and recommendation, the City Council has determined to grant the Special Use Permit, subject to the conditions set forth hereinbelow; and,

WHEREAS, the subject property is currently in the B-3 Zoning District of the City and gas stations and car washes and mini-marts are allowable Special Uses in said zoning district.

NOW, THEREFORE, BE IT ORDAINED BY THE CITY COUNCIL OF THE CITY OF DARIEN, DU PAGE COUNTY, ILLINOIS, as follows:

SECTION 1: A Special Use Permit is hereby granted to permit the construction and operation of a gasoline service station, car wash, and mini-mart on the subject property.

SECTION 2: The facility shall be constructed in accordance with the site plan prepared by FGM/C Incorporated and dated July 23, 1984 and shall be constructed in accordance with the representations made by Shell Oil Company during the August 28, 1985 Plan Commission hearing and shall further be subject to the following specific terms and conditions:

- Contd. -

ORDINANCE NUMBER 0-31-85

A. GENERAL CONDITIONS

1. The facility shall at all times be operated in accordance with relevant provisions of the Darien City Code to include relevant noise and odor emission regulations of the Illinois Environmental Protection Agency.

2. The facility shall not perform any automobile service or repair or vehicle or trailer rentals.

3. No alcoholic beverages shall be sold from the facility.

4. The car wash hours of operation shall be from 7:00 A.M. to 9:00 P.M.

B. TRAFFIC REGULATIONS

1. The owner shall post and maintain "NO EXIT" or similar signs in order to prevent vehicles from exiting the facility at the north curb cut on Cass Avenue and a "RIGHT TURN ONLY" sign at the south curb cut on Cass Avenue.

2. The owner shall utilize cones or similar on-site regulatory devices to prevent vehicles awaiting a car wash from stacking onto either Cass Avenue or Frontage Road.

3. Two (2) "NO LEFT HAND TURN" signs shall be installed in the west Cass Avenue right-of-way to face northbound Cass Avenue traffic at both north and south curb cuts on Cass Avenue. The signs shall be supplied and erected by the City of Darien.

4. On-site traffic signs to indicate north bound Cass Avenue traffic to exit via Frontage Road.

ORDINANCE NUMBER 0-31-85

C. ENGINEERING AND UTILITIES

1. No construction shall commence until such time as the City Engineer approves of Shell's drainage and storm water retention plans.

2. Owner agrees to tap onto the City of Darien's water and other utility lines at the owner's property line at such time as an appropriate service connection is available to the subject property from Cass Avenue. Owner further agrees to pay a maximum of five-thousand dollars ($5,000.00) as its share of the cost of the extension of such lines. Construction of the water line to serve Shell shall be coordinated so that Shell can tap onto the system during the course of construction of the facility. If this coordination cannot be achieved, even after good faith negotiation has been conducted to arrive at an equitable solution, Shell shall not be required to tap onto this system.

D. LIGHTING AND SIGNAGE

1. All on-site lighting shall be designed and installed in such a manner as to prevent any spillage onto all adjacent private properties.

2. Without waiving any of its rights to the use of the easement for road purposes along the southern edge of the subject property, permission is granted by the City to allow the owner to erect and maintain its identification sign on said easement in accordance with the facility site plan and in accordance with all applicable City ordinances and other regulations.

3. All signage shall meet and comply with City of Darien Code requirements.

ORDINANCE NUMBER 0-31-85

E. LANDSCAPING AND FENCING

1. The owner shall install an eight foot (8') high stockade-type fence along the north two-hundred twenty-five feet (225') of the western perimeter of the subject property.

2. A fence shall be constructed along the west two-hundred forty feet (240') of the northern property line with the first two-hundred twenty feet (220') being eight feet (8') in height, and the next ten feet (10') being six feet (6') in height, with the next ten feet (10') being four feet (4'), or such other acceptable method of constructing the fence as the City and Shell may agree. The remaining portion of the north property line shall be landscaped with low-line vegetation. However, in the event it is determined that the eastern building line of the residence to the immediate north of the subject property is set back less than sixty feet (60') from the property line along Cass Avenue, the owner shall extend the fence along the northern proeprty line of the subject property so that said fence extends at least ten feet (10') east of said building line.

3. In addition, the owner shall construct a berm and plantings on the church property along the westerly one-hundred feet (100') of the abutting property line.

SECTION 3: This Ordinance shall be in full force and effect upon its passage, approval, and publication in pamphlet form as provided by law.

ORDINANCE NUMBER 0-31-85

SURVEYOR'S NOTES

1. THIS SURVEY WAS PREPARED FOR RTM ENGINEERING CONSULTANTS, INC.
3. NO EASEMENTS OR SETBACKS WERE CREATED BY THE FINAL PLAT OF SUBDIVISION, EASEMENT SHOWN HEREON WAS CREATED BY DOCUMENTNUMBER R86-087385. REFER TO CURRENT TITLE COMMITMENT, ZONING REGULATIONS OR OTHER DOCUMENTS FOR SETBACK, EASEMENT OR OTHER REQUIREMENTS NOT SHOWN HEREON, IF ANY.
4. BUILDING TIES ARE SHOWN FROM OUTSIDE LIMITS OF COATED CONCRETE BLOCK CONSTRUCTION.
5. DISTANCES ARE MARKED IN U.S. SURVEY FEET. NO DIMENSION SHALL BE ASSUMED BY SCALE MEASUREMENT HEREON. DISTANCES AND/OR BEARINGS SHOWN IN PARENTHESIS (456.67') ARE RECORD OR DEED VALUES, NOT FIELD MEASURED. BEARINGS ARE GEODETIC BASED ON FOUND MONUMENTATION LOCATED AND MEASURED USING TRIMBLE'S VIRTUAL REFERENCE SYSTEM (NAD 83, ILLINOIS STATE PLANE, EAST ZONE), AND THE FINAL PLAT OF SUBDIVISION.
6. MANHOLES, INLETS, OTHER UTILITY RIMS OR GRATES, SHOWN HEREON ARE FROM FIELD LOCATION OF SUCH BASED ON LID MARKINGS, AND ONLY REPRESENT SUCH UTILITY IMPROVEMENTS WHICH ARE VISIBLE FROM ABOVE GROUND AT TIME OF SURVEY, THROUGH A NORMAL SEARCH AND WALK THROUGH OF THE SITE. UNDERGROUND UTILITY LINES EXIST BUT ARE NOT SHOWN HEREON AND OBSERVATIONS HAVE NOT BEEN MADE TO DETERMINE THE EXTENT OF UTILITIES SERVING OR EXISTING ON THE PROPERTY.
7. ONLY THE IMPROVEMENTS WHICH WERE VISIBLE FROM ABOVE GROUND AT TIME OF SURVEY AND THROUGH A NORMAL SEARCH AND WALK THROUGH OF THE SITE ARE SHOWN ON THE FACE OF THIS PLAT. LAWN SPRINKLER SYSTEM HEADS, IF ANY, ARE NOT SHOWN ON THIS SURVEY.
8. THIS SURVEY MAY NOT REFLECT ALL IMPROVEMENTS ON THE PROPERTY IF SUCH ITEMS WERE HIDDEN BY LANDSCAPING, FOLIAGE, EARTH, PAVEMENT, CONCRETE OR WERE COVERED BY SUCH ITEMS AS DUMPSTERS, PALETTES, STOCK MATERIALS, EQUIPMENT, TRAILERS OR OTHER OBJECTS.
9. OTHER THAN VISIBLE OBSERVATIONS NOTED HEREON, THIS SURVEY MAKES NO STATEMENT REGARDING THE ACTUAL PRESENCE OR ABSENCE OF ANY SERVICE OR UTILITY LINE. USE OF UTILITY ATLAS RECORDS, IF ANY, AND/OR CONTROLLED UNDERGROUND EXPLORATORY EFFORTS, TOGETHER WITH UTILITY COMPANY LOCATE MARKINGS IS RECOMMENDED TO DETERMINE THE EXTENT OF UNDERGROUND SERVICE AND UTILITY LINES. CONTACT JURISDICTIONAL AGENCIES, J.U.L.I.E., D.I.G.G.E.R. OR PRIVATE UTILITY LOCATING COMPANY FOR RECORDS OR SCHEDULING A LOCATE.
10. THE LOCATION OF THE PROPERTY LINES SHOWN ON THE FACE OF THIS PLAT ARE BASED ON THE LEGAL DESCRIPTION AND INFORMATION PROVIDED BY THE CLIENT, THE PARCEL WHICH IS DEFINED MAY NOT REFLECT ACTUAL OWNERSHIP, BUT REFLECTS WHAT WAS SURVEYED. FOR OWNERSHIP, CONSULT YOUR TITLE COMPANY.
11. COMPARE THIS PLAT, LEGAL DESCRIPTION AND ALL SURVEY MONUMENTS BEFORE BUILDING, AND IMMEDIATELY REPORT ANY DISCREPANCIES TO THE SURVEYOR.

ZONING VARIATIONS

INFORMATION and APPLICATION

REV 12/21

Assistance

All zoning standards and procedures are described in detail in the City Code, Title 5A, which is presented in full on the City website www.darienil.us. This website also has links to this packet and related information. The City Staff is dedicated to help all those involved. Our goal is to make your experience understandable, informative, meaningful, protective of your rights, responsive to your needs, and not unnecessarily long or costly. Contact the City Planner for guidance.

Available Relief

The zoning standards are uniform throughout the City and for each zoning district. However, there may be some unique properties that would be very difficult to develop if strictly conforming to these zoning standards. So, zoning relief may be available. Property owners have the opportunity to apply for variations that would substitute a lesser zoning standard to be used for a particular development but only for properties that have a unique hardship situation. For example, locating a proposed house 35 feet setback from the rear lot line of a property in the R-1 District would not normally be allowed where the uniform zoning standard is 40 feet, however a variation might be justified if the particular lot is extra shallow.

Fair Process

The City has a process to review each zoning variation application on its merits. It starts with the property owner or buyer or builder or their representative submitting an application with all the relevant information needed. The City staff (and consultants if needed) review the application, assist the applicant on technical issues, and schedule a public hearing for the Planning and Zoning Commission. The PZC are nine volunteer residents appointed by the Mayor and City Council to evaluate all variation applications. The PZC approves or denies 'simple' variations, which are front yard or corner side yard reductions of 10% or less or side yard reductions to not less than 7.5 feet for single family houses. For all other types of variations, the PZC recommends to the Municipal Services Committee. The MSC are three aldermen who review the findings of the PZC and make their own recommendation to the full City Council. The City Council then has the final vote to approve or deny. The process usually takes about 2-3 months, but in some cases it may take longer if hearings are continued to get more information.

Transparency

A key step in the process is the public hearing held by the PZC. The application and City staff report are posted on the City website for all to see before the hearing. City staff mails notice of the hearing to neighbors and publishes it in a local newspaper and posts it in City Hall. The applicant places a sign on the property that gives notice of the hearing. Everyone is invited to attend, listen to the applicant's presentation, join in the discussion, and give their comments. Decision criteria in the Code are used to focus all input to determine the unbiased, objective reasons for or against the variation requested.

CITY OF DARIEN

ZONING VARIATIONS

SUBMITTAL CHECKLIST

X 1. APPLICATION. *See attached one-page form.*

X 2. OWNER AUTHORIZATION LETTER. If the applicant is not the owner, include letter from owner describing the relation to applicant and authorizing the applicant to act on behalf of the owner.

N/A 3. PROOF OF OWNERSHIP. If the owner name and address on the Application form is different than on the County Tax Assessor's records, then include proof of ownership such as a deed or title search and list of trust beneficiaries, partners, or corporation owners and officers.

X 4. APPLICATION FEE. Cash or check payable to the City of Darien. This is non-refundable and is used to pay for administrative expenses. *See attached Fee Schedule.*

X 5. REIMBURSEMENT AGREEMENT. Some case reviews may need extra engineering, legal, or other consultants review, publication, recording, or other costs. By signing this form, the applicant agrees to reimburse the City if there are such costs. *See attached form.*

X 6. NEIGHBOR LIST. Provide a stamped envelope with name and address of the owner of each of the neighboring properties within 250 feet of the applicant's property. City staff will put notices of the public hearing in each envelope and then mail them. These names and addresses can be obtained from the Downers Grove Township Assessor's Office 630-719-6630.

___ 7. PUBLIC NOTICE SIGN(S). The applicant must provide and post one or two signs on the property giving notice when the public hearing is scheduled. *See attached Public Hearing Signs and Hearing Schedule.*

X 8. PLAT OF SURVEY. It should show property boundaries, easements, buildings, other structures, legal description, and any other existing conditions relevant to the variation requested.

X 9. PLANS. Usually this includes a site plan, drawn to scale on the plat of survey, showing proposed improvements with appropriate dimensions. One copy is sufficient if 11"x17" or smaller. Ten copies if larger than 11"x17" or in color. Additional plans may be appropriate to show all relevant information depending on the nature of the variation being requested, such as;

- X elevation drawings
- X photos simulations
- ___ traffic studies
- X landscaping plans
- ___ other (*contact the City Planner for guidance*)

X 10. JUSTIFICATION NARRATIVE. The applicant is responsible for providing written evidence (facts) that supports a conclusion (finding) that the variation is necessary and would not cause problems. *See attached form.*

DEVELOPMENT APPLICATIONS

REIMBURSEMENT AGREEMENT

The undersigned applicant for development approval acknowledges that the City of Darien may seek advice and council from professional sources outside the employee staff of the City of Darien. The purpose of such consultation would be for traffic impact analysis, engineering, stormwater, legal, or other such reviews related to variation, special use, rezoning, subdivision, site plan, permits, or other proposals submitted to the City of Darien by the applicant. The City of Darien may also incur expenses as part of the development review and approval process, such as copying, mailing, publication, recording, inspecting, or other such activities.

As an express condition in submitting said application and the consideration thereof by the City of Darien, the applicant both personally and on behalf of the property owner(s), agrees to reimburse the City of Darien forthwith for all costs and expenses that may be incurred by the City of Darien for such consultation and activities.

The applicant hereby accepts and acknowledges that if at any time the application fails to pay for such consultation and activity costs in accordance with the direction of the City of Darien, the no further action will be taken by the City of Darien in relation to the application until such time as said payment is paid in full.

For new development/redevelopment (excluding petitions involving a single-family residence):
$2,000.00 deposit required when the petition is submitted, to be returned once all invoices from professional services are paid (engineering, legal and traffic reviews, etc.)

The bill incurred for publishing the public hearing notice in the newspaper will be billed to the petitioner (excluding petitions involving a single-family residence.)

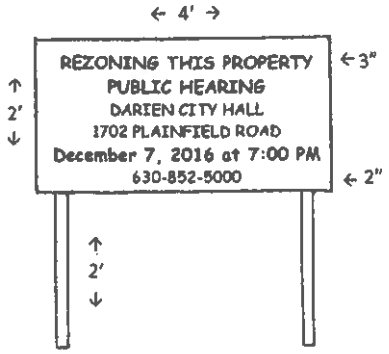
CITY OF DARIEN

ZONING APPLICATIONS

PUBLIC NOTICE SIGNS

Applicants requesting zoning approval of a map amendment, special use, variation or annexation are responsible for obtaining, posting, and maintaining signs on the subject property to inform the public about the application and the public hearing. See City Code Section 5A-2-3 (B).
Contact the City Planner for guidance.

1. Post sign(s) for 15 – 30 days before hearing and remove within 3 days after City Council vote.
2. Place one sign in front yard where most visible to drivers, but not in parkway.
3. Place a second sign for large or usual lots.
4. Signs should be made of durable materials to withstand weather.
5. Signs are to be self-supporting – not attached to buildings, fences, trees.
6. Signs should be legible from street – light background, dark letters – no hand lettering.
7. Minimum sizes 8 – 32 square feet – see samples below.



For lots less than 1 acre

For lots 1 acre or larger

****Due to City Hall Closure for Holiday, Please Note Date Change.**

CITY OF DARIEN

ZONING VARIATIONS

JUSTIFICATION NARRATIVE

Purpose

To be consistent and fair, the City is obligated to make decisions on zoning variation requests based on findings-of-fact. The Applicant should write a justification narrative that contains evidence (facts) that support a conclusion (finding) that the variation is necessary and would not cause problems. It should include: a) explanation of why the variation is being requested, b) describe the 'hardship condition' of the property that makes it difficult to conform, c) estimate the impact on neighbors , and d) respond to each of the decision criteria below.

Decision Criteria (See City Code Section 5A-2-2-3)

2a. The property in question cannot yield a reasonable return if permitted to be used only under the conditions allowed by the regulations in the zone.

2b. The plight of the owner is due to unique circumstances.

2c. The variation if granted will not alter the essential character of the locality.

3a. Essential Need? The owner would suffer substantial difficulty or hardship and not mere inconvenience or a decrease in financial gain if the variation is not granted.

3b. Problem with Property? There is a feature of the property such as slope or shape or change made to the property, which does not exist on neighboring properties, which makes it unreasonable for the owner to make the proposed improvement in compliance with the Zoning Code. Such feature or change was not made by the current owner and was not known to the current buyer at the time of purchase.

3c. Smallest Solution? There is no suitable or reasonable way to redesign the proposed improvements without incurring substantial difficulty or hardship or reduce the amount of variation required to make such improvements.

3d. Create Neighbor Problem? The variation, if granted, will not cause a substantial difficulty, undue hardship, unreasonable burden, or loss of value to the neighboring properties.

3e. Create Community Problem? The variation, if granted, may result in the same or similar requests from other property owners within the community, but will not cause an unreasonable burden or undesirable result within the community.

3f. Net Benefit? The positive impacts to the community outweigh the negative impacts.

3g. Sacrifice Basic Protections? The variation, if granted, will comply with the purposes and intent of the Zoning Code set forth in Section 5A-1-2(A) and summarized as follows; to lessen congestion, to avoid overcrowding, to prevent blight, to facilitate public services, to conserve land values, to protect from incompatible uses, to avoid nuisances, to enhance aesthetic values, to ensure an adequate supply of light and air, and to protect public health, safety, and welfare.

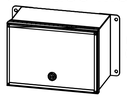
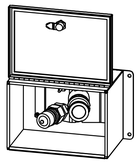
(pictorial view, verify with supplier)
(obtain supplier cut sheet for both)

Surface Mount Fill Box



Front View
(lid closed)



Front View
(lid open)

- Fill Box Dimensions:
  - Height = 7"
  - Width = 13" (including flange)
  - Depth = 6"
- Materials of Construction:
  - Stainless steel enclosure
  - Stainless steel inner panel
- Features:
  - Integral locking latch (key retained by RTI employees)
  - Food-grade new oil coupler
  - Incompatible waste oil coupler
  - Electrical connector for overfill protection
  - Drip tray to catch residual oil
- Mounting details:
  - Surface mounted
  - 3" diameter hole through wall (sealed)
  - Locate within 15 feet of waste oil tank (longer distances possible, but delivery times increase)
  - Locate away from drive-thru (if applicable)

Traffic Impact Study
Fuel Center Redevelopment

Darien, Illinois

Prepared For:

rtm

KLOA
Kenig, Lindgren, O'Hara, Aboona, Inc.

February 14, 2025

1. Introduction

This report summarizes the methodologies, results, and findings of a traffic impact study conducted by Kenig, Lindgren, O'Hara, Aboona, Inc. (KLOA, Inc.) for the proposed redevelopment of the existing fuel center located in Darien, Illinois. The site is located in the northwest corner of the intersection of Cass Avenue with the Frontage Road/Hinswood Drive. As proposed, the existing fuel center with 12 fueling positions will be redeveloped to include a larger convenience store totaling approximately 5,400 square feet. Access to the fuel center will be provided via the existing access drives off Cass Avenue and the east-west access road (Access Road) that serves the fuel center and Alpine Banquets and connects to the Frontage Road (access road).

The purpose of this study was to examine background traffic conditions, assess the impact that the proposed redevelopment will have on traffic conditions in the area, and determine if any roadway or access improvements are necessary to accommodate traffic generated by the proposed redevelopment. **Figure 1** shows the location of the site in relation to the area roadway system. **Figure 2** shows an aerial view of the site.

The sections of this report present the following:

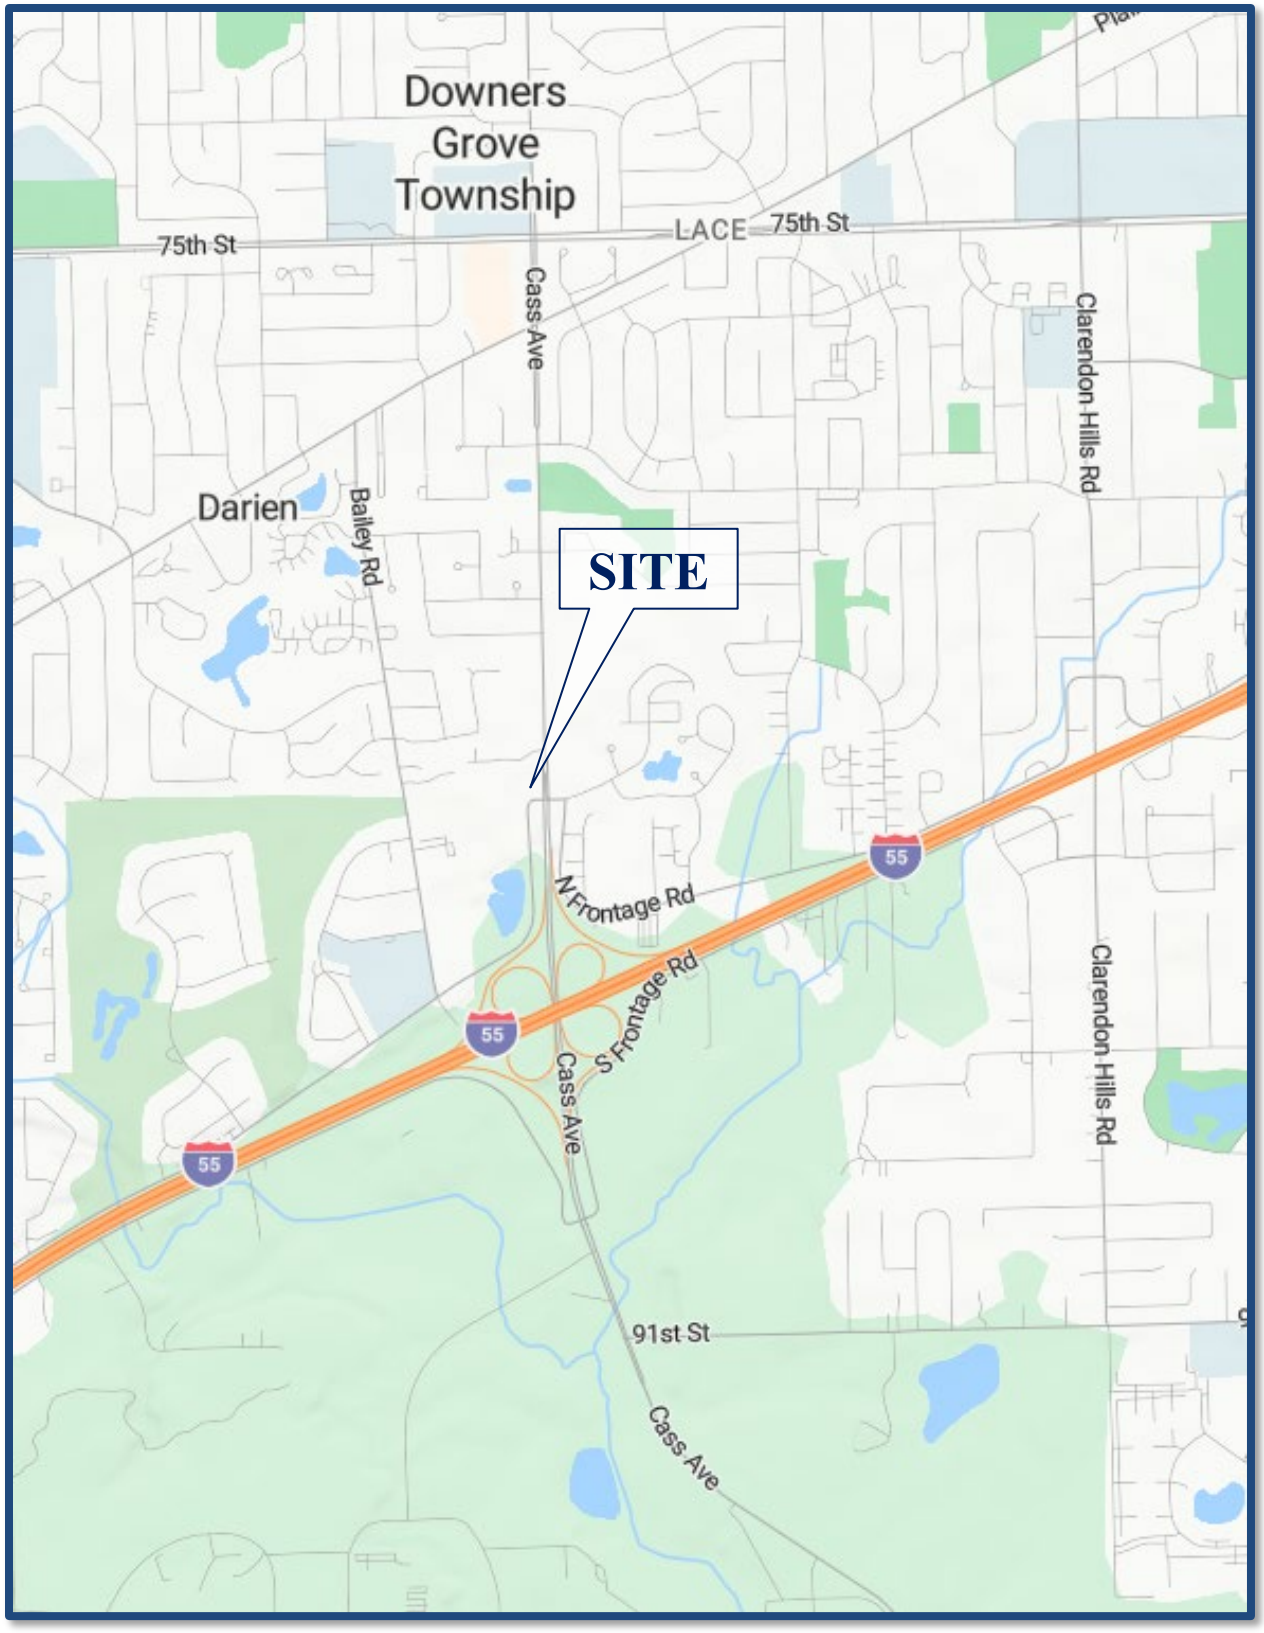
- Existing roadway conditions
- A description of the proposed redevelopment
- Directional distribution of the redevelopment traffic
- Vehicle trip generation for the redevelopment
- Future traffic conditions including access to the redevelopment
- Traffic analyses for the weekday morning and weekday evening peak hours
- Recommendations with respect to adequacy of the site access and adjacent roadway system

Traffic capacity analyses were conducted for the weekday morning and weekday evening peak hours for the following conditions:

1. Existing Conditions – Analyzes the capacity of the existing roadway system using existing peak hour traffic volumes in the surrounding area.

2. Year 2030 No-Build Conditions – Analyzes the capacity of the existing roadway system using existing traffic volumes increased by an ambient area growth factor not attributable to any particular development.

3. Projected Conditions – Analyzes the capacity of the future roadway system using the projected traffic volumes that include the existing traffic volumes, ambient area growth not attributable to any particular development, and the traffic estimated to be generated by the proposed redevelopment.



Site Location **Figure 1**

Aerial View of Site **Figure 2**

2. Existing Conditions

Existing transportation conditions in the vicinity of the site were conducted by KLOA, Inc. in order to obtain a database for projecting future conditions. The following provides a description of the geographical location of the site, physical characteristics of the area roadway system including lane usage and traffic control devices, and existing peak hour traffic volumes.

Site Location

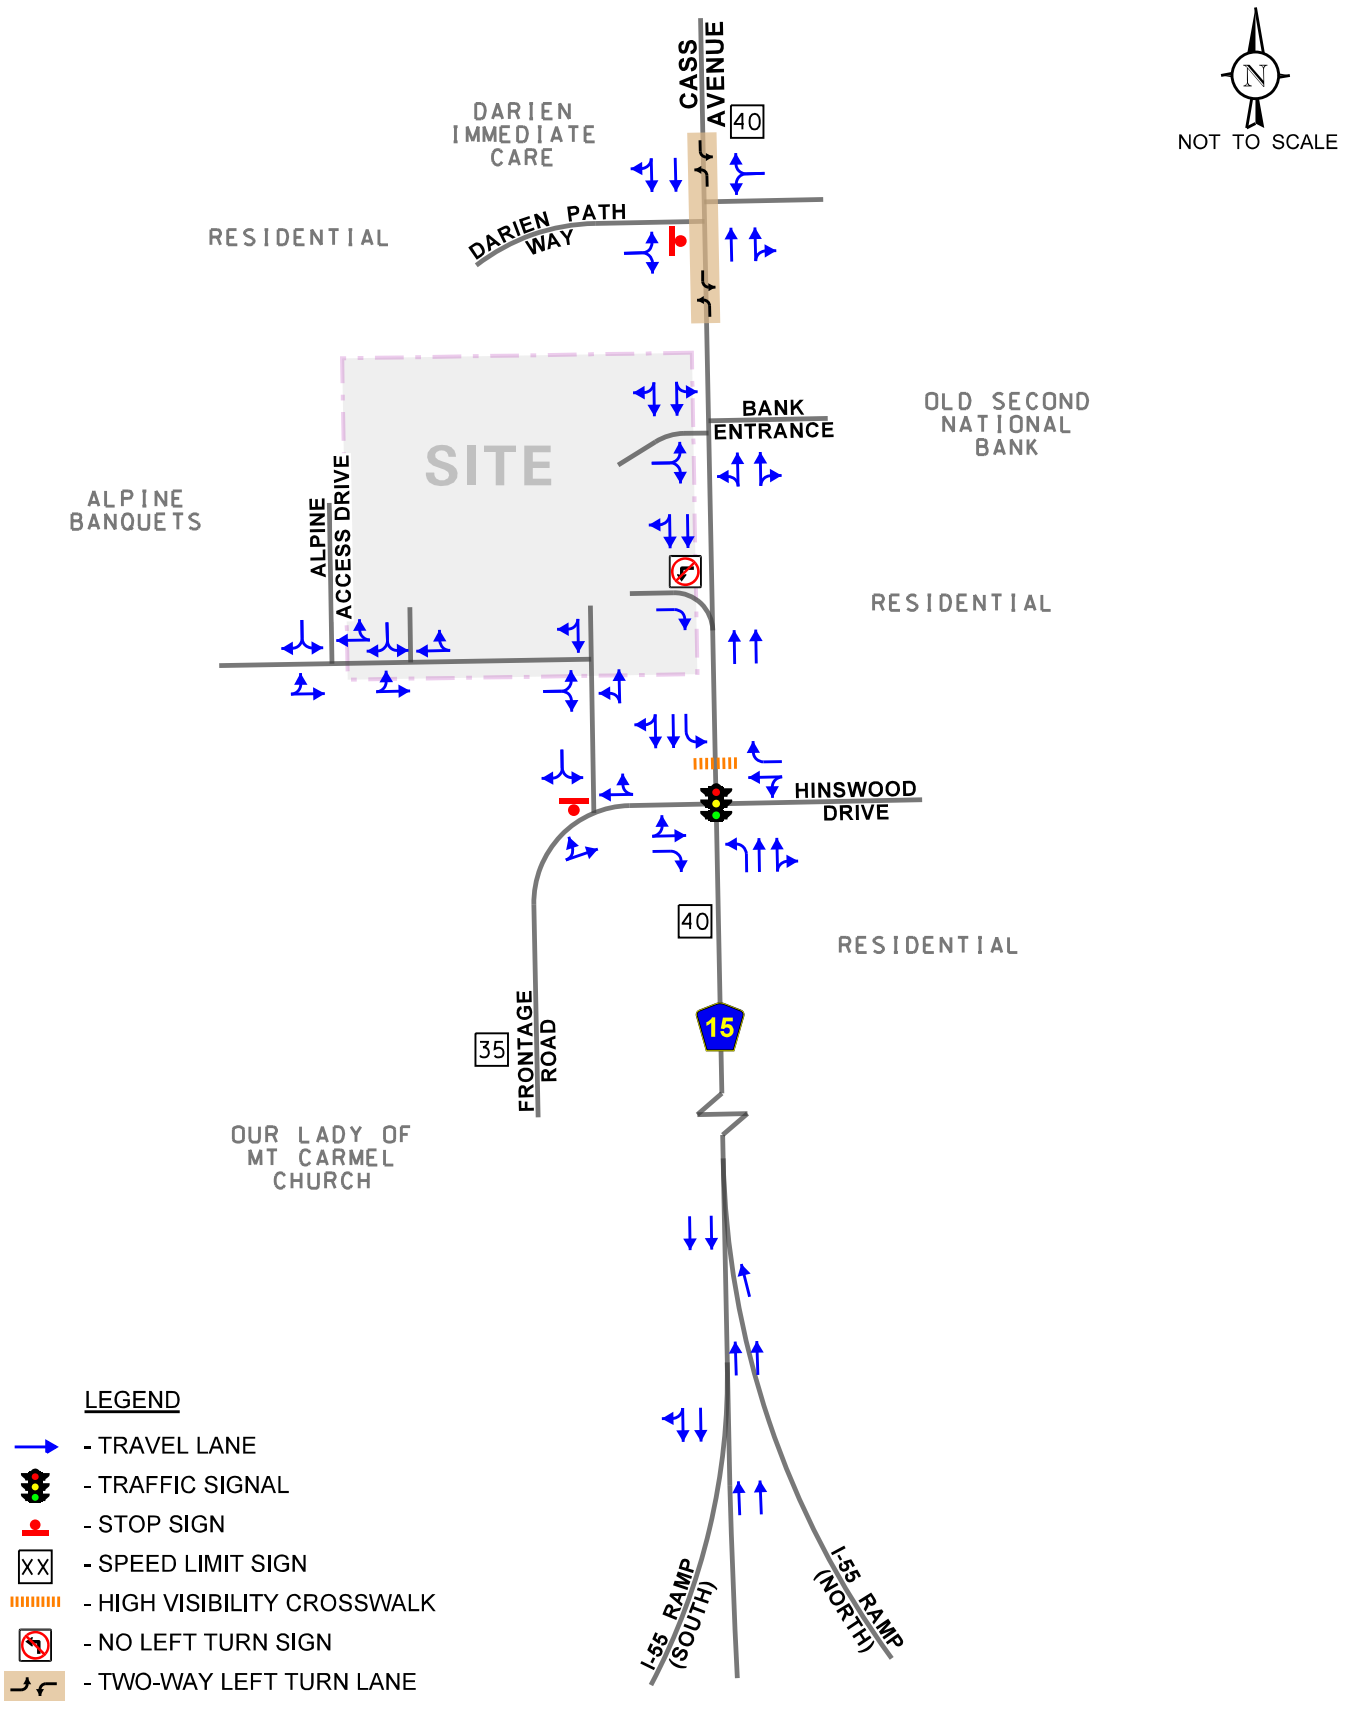
The site is located at 8226 South Cass Avenue in the northwest corner of Cass Avenue with the Frontage Road. The site is bordered by Cass Avenue on the east, the Frontage Road on the south, Alpine Banquets on the west, and Darien Path Way on the north. Land uses in the vicinity of the site include commercial uses along Cass Avenue and residential uses in all directions. It should be noted that Cass Avenue has a full interchange with Interstate 55 approximately 2,040 feet to the south (approximately 0.4 miles).

Existing Roadway System Characteristics

The characteristics of the existing roadways near the redevelopment are described below and illustrated in **Figure 3**.

Cass Avenue is a north-south minor arterial roadway that provides two through lanes in each direction in the vicinity of the site. At its signalized intersection with the Frontage Road/Hinswood Drive, Cass Avenue provides a left-turn lane, a through lane, and a combined through/right-turn lane on the northbound and southbound approaches. A high-visibility crosswalk is provided on the north leg of the intersection. North of the Frontage Road intersection, Cass Road provides a two-way left-turn lane and no exclusive turn lanes are provided for any access drives or local roadways included in the study area. Cass Avenue carries an annual average daily traffic (AADT) volume of 21,100 vehicles north of the Frontage Road and 12,500 vehicles to the south (IDOT 2020). Cass Avenue is under the jurisdiction of the DuPage County Division of Transportation (DuDOT) and has a posted speed limit of 40 miles per hour.

Frontage Road/Hinswood Drive is an east-west roadway that is classified as a local roadway east of Cass Avenue and a minor collector roadway west of Cass Avenue. Hinswood Drive runs concurrently with the Frontage Road east of Cass Avenue for approximately 195 feet. At its signalized intersection with Cass Avenue, the Frontage Road provides a combined left-turn/through lane and a right-turn lane on the eastbound and westbound approaches. At its unsignalized intersection with the access road, the Frontage Road provides no separate turn lanes. The Frontage Road is under the jurisdiction of the Illinois Department of Transportation (IDOT) and has a posted speed limit of 35 miles per hour.



Fuel Center
Darien, Illinois

Existing Roadway Characteristics

KLOA
Kenig,Lindgren,O'Hara,Aboona,Inc.

Job No: 24-298 Figure: 3

Darien Path Way is an east-west local roadway that provides one lane in each direction extending west from Cass Avenue. At its unsignalized intersection with Cass Avenue, Darien Path Way provides a combined left-turn/through/right-turn lane that is under stop sign control. The roadway is under the jurisdiction of the City of Darien.

The *East-West Access Road (Access Road)* is a roadway that connects access drives for the existing fuel center and Alpine Banquets to the Frontage Road west of Cass Avenue. The access road provides one lane in each direction. At its unsignalized intersection with the Frontage Road, the access road provides a combined left-turn/right-turn lane on the southbound approach that is under stop sign control. The access road is under private jurisdiction.

Existing Traffic Volumes

In order to determine current traffic conditions in the vicinity of the site, KLOA, Inc. conducted peak period vehicle, pedestrian, and bicycle traffic counts using Miovision Video Scout Collection Units on Wednesday, December 4, 2024, during the weekday morning (7:00 to 9:00 A.M.) and weekday evening (4:00 to 6:00 P.M.) peak periods at the following intersections:

- Cass Avenue with Frontage Road/Hinswood Drive
- Cass Avenue with South Site Access Drive
- Cass Avenue with North Site Access Drive
- Cass Avenue with Darien Path Way/North Bank Access Drive
- Frontage Road with Access Road
- Access Road with East Site Access Drive
- Access Road with West Site Access Drive
- Access Road with Alpine Banquets Access Drives
- Cass Avenue with Interstate 55 Southbound Exit Ramp
- Cass Avenue with Interstate 55 Southbound Entrance Ramp

From the count data, it was determined that the weekday morning peak hour generally occurs between 7:15 and 8:15 A.M. and the weekday evening peak hour generally occurs between 4:45 and 5:45 P.M. The existing peak hour traffic volumes are shown in **Figure 4**.

Crash Data Summary

KLOA, Inc. obtained crash data[1] from IDOT for the most recent available five years (2019 to 2023) for the intersections of Cass Avenue with Frontage Road, Darien Path Way, and the Interstate 55 southbound exit and entrance ramps. No crashes were reported at the Interstate 55 ramps during the review period. The crash data for the intersections are summarized in **Tables 1** and **2**. A review of the crash data indicated no fatalities were reported at the intersections during the review period.

3. Traffic Characteristics of the Proposed Redevelopment

In order to properly evaluate future traffic conditions in the surrounding area, it was necessary to determine the traffic characteristics of the proposed redevelopment, including the directional distribution and volumes of traffic that it will generate.

Proposed Site and Redevelopment Plan

As proposed, the existing fuel center will be redeveloped to contain a larger convenience store, totaling approximately 5,400 square feet. The fuel center will continue to provide 12 fueling positions. Access to the fuel center will be provided via the following:

- The existing north access drive on Cass Avenue located approximately 175 feet south of Darien Path Way will remain and continue to provide access to the site. This access drive will provide one inbound lane and one outbound lane, with outbound movements under stop sign control.

- The existing south access drive on Cass Avenue located approximately 320 feet south of Darien Path Way will remain and continue to provide access to the site. This access drive will provide one inbound lane and one outbound lane, with outbound movement under stop sign control. Movements will continue to be restricted via posted signage to right-turns only based on the geometry of the access drive and its proximity to the traffic signal.

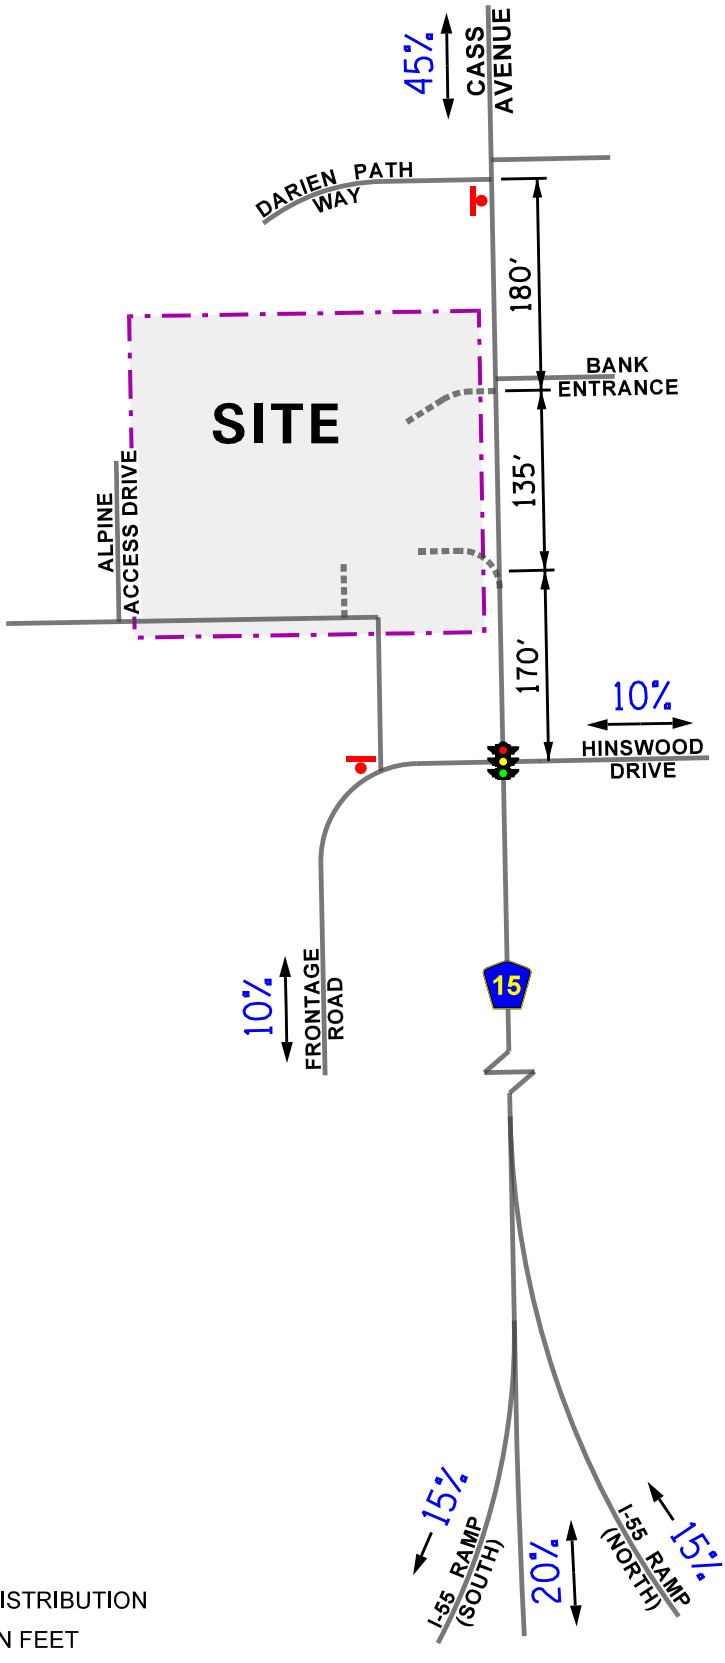
- The existing east access drive located off the east-west access road that serves the fuel center and Alpine Banquets and connects to the Frontage Road (access road), approximately 140 feet north of the intersection of the Frontage Road with the access road will remain and continue to provide access to the site. This access drive will be widened with outbound movements under stop sign control.

- As part of the redevelopment of the fuel center, the existing west access drive off the access road will be eliminated.

A site plan illustrating the proposed site and development plan is included in the Appendix.

Directional Distribution

The directional distribution of future site-generated trips on the roadway system is a function of several variables, including the operational characteristics of the roadway system, the ease with which drivers can travel over various sections of the roadway system, and the restrictions of the proposed access drive. This is particularly true for pass-by traffic. The directional distribution was based on these factors. The estimated directional distribution for the proposed development is illustrated in **Figure 5**.



Fuel Center Darien, Illinois	Directional Distribution	KLOA Kenig,Lindgren,O'Hara,Aboona,Inc. Job No: 24-298 Figure: 5

Peak Hour Traffic Volumes

The estimates of traffic to be generated by the proposed fuel center are based on the trip generation rates contained in the ITE *Trip Generation Manual*, 11th Edition for Land-Use Code 945 (Convenience Store/Gas Station).

As the site is currently operating as a fuel center with 12 fueling positions, the existing trips to the site were subtracted from the ITE rates for a proposed fuel center with 12 fueling positions to determine the total trips that will be made to the fuel center as a result of the redevelopment.

It is important to note that surveys conducted by ITE have shown that approximately 60 percent of trips are made to fuel centers are made up of existing traffic on the roadway system. This is particularly true during the weekday morning, evening peak hours when traffic is diverted from the home-to-work and work-to-home trips (pass-by traffic). As such, 60 percent of the traffic estimated to be generated by the redeveloped fuel center was assumed to be pass-by traffic.

Table 3 summarizes the trips projected to be generated by the proposed fuel center during the peak hours.

Table 3
PEAK HOUR SITE-GENERATED TRAFFIC VOLUMES

ITE Land-Use Code	Type/Size	Weekday Morning Peak Hour			Weekday Evening Peak Hour		
		In	Out	Total	In	Out	Total
945	Proposed Convenience Store/Gas Station (12 fueling positions)	96	97	193	111	110	221
	Existing Convenience Store/Gas Station (12 fueling positions)	-47	-44	-91	-50	-50	-100
	Total Trips	**49**	**53**	**102**	**61**	**60**	**121**
	60% Pass-By	*-30*	*-30*	*-60*	*-36*	*-36*	*-72*
	Total New Trips	**19**	**23**	**42**	**25**	**24**	**49**

4. Projected Traffic Conditions

The total projected traffic volumes include the existing traffic volumes, increase in background traffic due to growth, and the traffic estimated to be generated by the proposed subject development.

Development Traffic Assignment

The peak hour traffic volumes projected to be generated by the proposed redevelopment were assigned to the area roadways based on the established directional distribution (Figure 5).

Figure 6 shows the assignment of the redevelopment-generated traffic volumes. The pass-by traffic assignment is illustrated in **Figure 7**.

Background Traffic Conditions

The existing traffic volumes (Figure 4) were increased by a regional growth factor to account for the increase in existing traffic related to regional growth in the area (i.e., not attributable to any particular planned development). Based on Year 2050 Annual Average Daily Traffic (AADT) projections provided by the Chicago Metropolitan Agency for Planning (CMAP) in a letter dated November 12, 2024, the existing traffic volumes were increased by an annually compounded growth rate of approximately 0.3 percent per year for six years (buildout year plus five years) for a total of approximately two percent to project Year 2030 background conditions. A copy of the CMAP 2050 projections letter is included in the Appendix.

Figure 8 shows the Year 2030 background traffic volumes. A copy of the CMAP 2050 projections letter is included in the Appendix.

Total Projected Traffic Volumes

Total projected traffic volumes include the Year 2030 background traffic volumes (Figure 8), and the traffic estimated to be generated by the proposed redevelopment (Figures 6 and 7).

Figure 9 shows the Year 2030 total projected traffic volume conditions.

5. Traffic Analysis and Recommendations

The following provides an evaluation conducted for the weekday morning and weekday evening peak hours. The analysis includes conducting capacity analyses to determine how well the roadway system and access drive are projected to operate and whether any roadway improvements or modifications are required.

Traffic Analyses

Roadway and adjacent or nearby intersection analyses were performed for the weekday morning and weekday evening peak hours for the existing, no-build, and total projected traffic volumes.

The traffic analyses were performed using the methodologies outlined in the Transportation Research Board's *Highway Capacity Manual (HCM),* 6th Edition and analyzed using Synchro/SimTraffic 11 software. The analysis for the traffic-signal controlled intersections were accomplished using actual cycle lengths and phasings to determine the average overall vehicle delay and levels of service.

The analyses for the unsignalized intersections determine the average control delay to vehicles at an intersection. Control delay is the elapsed time from a vehicle joining the queue at a stop sign (includes the time required to decelerate to a stop) until its departure from the stop sign and resumption of free flow speed. The methodology analyzes each intersection approach controlled by a stop sign and considers traffic volumes on all approaches and lane characteristics.

The ability of an intersection to accommodate traffic flow is expressed in terms of level of service, which is assigned a letter from A to F based on the average control delay experienced by vehicles passing through the intersection. The *Highway Capacity Manual* definitions for levels of service and the corresponding control delay for signalized intersections and unsignalized intersections are included in the Appendix of this report.

Summaries of the traffic analysis results showing the level of service and overall intersection delay (measured in seconds) for the projected existing, no-build, and total projected conditions are presented in **Tables 4** through **7**. A discussion of each intersection follows. Summary sheets for the capacity analyses are included in the Appendix.

Discussion and Recommendations

The following summarizes how the intersections are projected to operate and identifies any roadway and traffic control improvements necessary to accommodate the redevelopment-generated traffic.

Cass Avenue with Frontage Road/Hinswood Drive

The results of the capacity analysis indicate that overall this intersection currently operates at Level of Service (LOS) C during the weekday morning peak hour and at LOS B during the weekday evening peak hour. The northbound and southbound approaches on Cass Avenue currently operate at LOS B during the peak hours. The eastbound and westbound approaches on the Frontage Road currently operate at LOS D or better during the peak hours. Under Year 2030 no-build conditions, the intersection and its approaches are projected to continue operating at the current levels of service during the peak hours, with increases in delay of approximately one second or less over the existing conditions.

Under Year 2030 total projected conditions, the intersection is projected to continue to operate at LOS C during the weekday morning peak hour and at LOS B during the weekday evening peak hour, with increases in delay of approximately one second over the no-build conditions. All approaches are projected to operate at an acceptable LOS D or better during the peak hours, with the exception of the eastbound approach, which during the weekday morning peak hour, is projected to operate at LOS E. Observations and a review of the traffic simulation indicate that the queues at the approach clear the intersection every cycle. Further, the volume to capacity ratio (v/c) is less than 1.0. It should be noted that the queue for the right-turn movement is projected to be 90 feet during the weekday morning peak hour and 52 feet during the weekday evening peak hour, which can be fully contained within the 100 feet of storage that the right-turn lane provides.

Overall, the proposed fuel center is only projected to increase the volume of traffic traversing this intersection by approximately one percent during the peak hours. As such, the intersection has sufficient reserve capacity to accommodate the traffic estimated to be generated by the fuel center redevelopment, and no roadway or traffic signal modifications are required.

Cass Avenue with South Site Access Drive

The results of the capacity analysis indicate that the eastbound approach, which is restricted to right turns only, currently operates at LOS B during the weekday morning and weekday evening peak hours. Under Year 2030 no-build and total projected conditions, the eastbound approach is projected to continue to operate at the current levels of service, with increases in delays of less than one second over the existing conditions. As such, this access drive is projected to accommodate the increase in traffic generated by the fuel center redevelopment, and no additional roadway or traffic control modifications are required.

Cass Road with North Site Access Drive/South Bank Access Drive

The results of the capacity analysis indicate that the eastbound approach from the north site access drive currently operates at LOS D during the weekday morning and weekday evening peak hours. The northbound left-turn movement currently operates at LOS B or better during the peak hours. Under Year 2030 no-build and total projected conditions, the critical movements and approaches are projected to continue to operate at the current levels of service, with increases in delay of approximately three seconds or less over the existing conditions. It should be noted that the southbound queues on Cass Avenue extending from the Frontage Road occasionally extend to this access drive, impacting the eastbound left-turn movement and the northbound left-turn movement. Queues typically clear within one signal cycle. Additionally, gaps in the traffic flow allow for left-turn movements due to the platooning from traffic signal to the north on Cass Avenue. As such, this access drive is projected to accommodate the increase in traffic generated by the fuel center redevelopment, and no additional roadway or traffic control modifications are required.

Cass Avenue with Darien Path Way/North Bank Access Drive

The results of the capacity analysis indicate that the eastbound approach from Darien Path Way and the westbound approach from the north bank access drive currently operate at LOS C or better during the weekday morning and weekday evening peak hours. The northbound and southbound left-turn movements currently operate at LOS B or better during the peak hours. Under Year 2030 no-build and total projected conditions, the critical movements and approaches are projected to operate at LOS C or better during the peak hours. As such, no roadway or traffic control modifications are required at this intersection in conjunction with the proposed fuel center redevelopment.

Frontage Road with Access Road

The results of the capacity analysis indicate that the southbound approach from the access road currently operates at LOS B during the weekday morning and weekday evening peak hours. The eastbound left-turn movement currently operates at LOS A during both peak hours. Under Year 2030 no-build and total projected conditions, the critical approaches and movements are projected to continue to operate at the current levels of service, with increases in delay of approximately one second over the existing conditions. It should be noted that the westbound queues on the Frontage Road extending from Cass Avenue occasionally extend to this intersection, specifically the left-turn/through movements which have a projected 95th percentile queue of approximately 290 feet during the weekday morning peak hour and 230 feet during the weekday evening peak hour. However, the queues typically clear within one signal cycle. This was confirmed based on a review of the traffic simulation, which was consistent with existing operations at the intersection. As such, this intersection is projected to continue to operate well and accommodate the traffic projected to be generated by the proposed fuel center redevelopment.

Access Road with East Site Access Drive

As this intersection is atypical with the northbound and eastbound approaches uncontrolled and the southbound approach from the access drive being under stop sign control, the intersection was evaluated using the Intersection Capacity Utilization (ICU) method. The results of the capacity analysis indicate that the intersection currently operates at ICU A with minimal queues during the weekday morning and weekday evening peak hours. Under Year 2030 no-build conditions, the intersection is projected to continue to operate at ICU A during the peak hours.

Under Year 2030 total projected conditions, this intersection will be widened. It is projected to operate at ICU A during both peak hours with minimal queues. However, it is recommended that the proposed width of the driveway be reduced while still accommodating traffic movements at this access drive. As such, given the reduction in the proposed access drive width, this access drive is projected to provide flexible and efficient access to the redeveloped fuel center and no additional roadway or traffic control modifications are required.

6. Conclusion

Based on the preceding analyses and recommendations, the following conclusions have been made:

- The existing fuel center on the site will be redeveloped to have a larger convenience store and continue to have 12 fueling positions.

- The proposed fuel center redevelopment is only projected to increase the volume of traffic traversing the intersection of Cass Avenue with the Frontage Road by approximately one percent during the peak hours.

- The results of the capacity analysis indicate that the roadway system generally has sufficient reserve capacity to accommodate the redevelopment-generated traffic and no roadway or traffic control improvements are required at the study area intersections.

- Access to the site will be provided via two existing access drives off Cass Avenue and one access drive off the east-west access road that serves the fuel center and Alpine Banquets and connects to the Frontage Road

- The proposed access system that will serve the site will be adequate in accommodating the traffic estimated to be generated by the proposed redevelopment of the fuel center and will ensure flexible access is provided.

Site Plan

NOTES:

1. ALL DIMENSIONS ALONG CURB LINES ARE TO FACE OF CURB, UNLESS NOTED OTHERWISE.
2. BUILDINGS AND ADJACENT TO BUILDING IMPROVEMENTS SHOWN ON THESE PLANS ARE BASED UPON THE BUILDING PLANS PROVIDED BY OTHERS AT THE DATE OF THESE PLANS BEING PREPARED. BUILDING PLANS NORMALLY CONTINUE TO CHANGE AFTER SITE PLANS HAVE BEEN APPROVED. THEREFORE THE CONTRACTOR SHALL USE THE BUILDING PLANS FOR FINAL BUILDING IMPROVEMENTS, AND VERIFY THAT ALL ADJACENT IMPROVEMENTS ARE CONSISTENT WITH THE DESIGN INTENT AND REQUIREMENTS OF THE SITE PLANS. THE CONTRACTOR SHALL NOTIFY ENGINEER IMMEDIATELY IF CLARIFICATION IS NEEDED, OR IF CONFLICTS OR INCONSISTENCIES EXIST.
3. ADA DETECTIBLE WARNING STRIPS SHALL BE CAST IRON TILES, WET SET INTO CONCRETE SURFACE, PER MANUFACTURERS INSTALLATION RECOMMENDATIONS.
4. TOPOGRAPHIC AND BOUNDARY SURVEY PREPARED BY SIGHT ON SOLUTIONS, INC.

(X) SIGNING AND STRIPING SCHEDULE

A. 4" YELLOW STRIPING
B. YELLOW HANDICAP PARKING STRIPING (SEE DETAIL)
C. "ACCESSIBLE" PARKING STALL SIGN ASSEMBLY (S250 FINE)
D. "STOP" SIGN R1-1 (30"X30")
E. 24" WHITE THERMOPLASTIC STOP BAR
F. 4" PAINTED CROSS STRIPING 4' C-C
G. DIRECTIONAL ARROW
H. RIGHT TURN ONLY R3-5 (24"X30")
I. THERMOPLASTIC RIGHT TURN ONLY STRIPING
J. 4" YELLOW LINES, 5.5' C-C SKIP-DASH AND SOLID
K. 6" SOLID WHITE THERMOPLASTIC.
L. "NO LEFT TURN" SIGN (30"X30")
M. 6" WHITE THERMOPLASTIC 6' SKIP 2' DASH

STRIPING NOTE: ON-SITE PAVEMENT MARKINGS AND GRAPHICS SHALL CONSIST OF TWO (2) COATS OF TRAFFIC-RATED PAINT APPLIED A MINIMUM OF 30 DAYS APART. STRIPING AND GRAPHICS AT ENTRY DRIVES SHALL BE THERMOPLASTIC AS NOTED. MATERIALS SHALL MEET ILLINOIS DEPARTMENT OF TRANSPORTATION STANDARDS.

(X) PARKING SUMMARY

	PROPOSED
REGULAR STALLS (9'x18')	18
ACCESSIBLE STALLS (14'x18')	1
TOTAL STALL COUNT	19

CMAP 2050 Projections Letter

Chicago Metropolitan Agency for Planning

433 West Van Buren Street, Suite 450
Chicago, IL 60607
cmap.illinois.gov | 312-454-0400

November 12, 2024

Ryan May
Project Coordinator
Kenig, Lindgren, O'Hara and Aboona, Inc.
9575 West Higgins Road
Suite 400
Rosemont, IL 60018

Subject: Cass Avenue with Frontage Road
IDOT

Dear Ms. May:

In response to a request made on your behalf and dated November 11, 2024, we have developed year 2050 average daily traffic (ADT) projections for the subject location.

ROAD SEGMENT	Current ADT	Year 2050 ADT
Cass Ave north of Frontage Rd	21,100	23,000
Cass Ave south of Frontage Rd	12,500	13,600

Traffic projections are developed using existing ADT data provided in the request letter and the results from the June 2024 CMAP Travel Demand Analysis. The regional travel model uses CMAP 2050 socioeconomic projections and assumes the implementation of the ON TO 2050 Comprehensive Regional Plan for the Northeastern Illinois area. The provision of this data in support of your request does not constitute a CMAP endorsement of the proposed development or any subsequent developments.

If you have any questions, please call me at (312) 386-8806 or email me at jrodriguez@cmap.illinois.gov

Level of Service Criteria

LEVEL OF SERVICE CRITERIA

Signalized Intersections		
Level of Service	**Interpretation**	**Average Control Delay (seconds per vehicle)**
A	Favorable progression. Most vehicles arrive during the green indication and travel through the intersection without stopping.	≤10
B	Good progression, with more vehicles stopping than for Level of Service A.	> 10 - 20
C	Individual cycle failures (i.e., one or more queued vehicles are not able to depart as a result of insufficient capacity during the cycle) may begin to appear. Number of vehicles stopping is significant, although many vehicles still pass through the intersection without stopping.	> 20 - 35
D	The volume-to-capacity ratio is high and either progression is ineffective or the cycle length is too long. Many vehicles stop and individual cycle failures are noticeable.	> 35 - 55
E	Progression is unfavorable. The volume-to-capacity ratio is high and the cycle length is long. Individual cycle failures are frequent.	> 55 - 80
F	The volume-to-capacity ratio is very high, progression is very poor, and the cycle length is long. Most cycles fail to clear the queue.	> 80

Unsignalized Intersections	
Level of Service	**Average Total Delay (sec/veh)**
A	0 - 10
B	> 10 - 15
C	> 15 - 25
D	> 25 - 35
E	> 35 - 50
F	> 50

Intersection Summary

Area Type: Other
Cycle Length: 120
Actuated Cycle Length: 120
Offset: 25 (21%), Referenced to phase 2:NBTL and 6:SBTL, Start of Green
Natural Cycle: 75
Control Type: Actuated-Coordinated
Maximum v/c Ratio: 0.88
Intersection Signal Delay: 23.7 Intersection LOS: C
Intersection Capacity Utilization 58.8% ICU Level of Service B
Analysis Period (min) 15
95th percentile volume exceeds capacity, queue may be longer.
Queue shown is maximum after two cycles.

Splits and Phases: 1: Cass Avenue & Frontage Road/Hinswood Drive

Intersection Summary

Area Type: Other
Cycle Length: 120
Actuated Cycle Length: 120
Offset: 25 (21%), Referenced to phase 2:NBTL and 6:SBTL, Start of Green
Natural Cycle: 75
Control Type: Actuated-Coordinated
Maximum v/c Ratio: 0.91
Intersection Signal Delay: 24.8 Intersection LOS: C
Intersection Capacity Utilization 60.2% ICU Level of Service B
Analysis Period (min) 15
95th percentile volume exceeds capacity, queue may be longer.
Queue shown is maximum after two cycles.

Splits and Phases: 1: Cass Avenue & Frontage Road/Hinswood Drive

January 22, 2025

City of Darian
1702 Plainfield Road
Darien, Illinois

Attention: Ryan Murphy

Subject: 8226 S. Cass Road – True North Energy LLC
(CBBEL Project No. 950323.H0266)

Dear Ryan:
As requested on January 21, 2025, we have reviewed the Preliminary Plans for a proposed gas station prepared by RTM Engineering Consultants and dated April 26, 2019. Previously, the site consisted of a separate drive through car wash and mini mart. The proposed project will eliminate the car wash and relocate the mini mart into a larger store where the car wash was originally located.

Preliminary Plans

All previous comments have been addressed, and we believe the preliminary engineering plans are now in general compliance with County stormwater management requirements and City code.

As the preliminary final engineering plans were also submitted, the following comments shall be addressed during the Final Engineering Plan Review process upon approval from the Planning and Zoning Commission:

Final Engineering Plans

Sheet C0.0

1. The owner's contact information shall be added to the cover sheet.
2. Under NOTES, note 2, revise note to state that the contractor shall notify all utility companies at minimum 2 business days before the beginning of construction.
3. The design engineer's stamp and stormwater certification shall be added to the sheet.

Sheet C1.0

4. Under GENERAL NOTES AND CONDITIONS, notes 11 and 12, the 48 hours shall be changed to 2 business days.
5. The existing water service line size shall be specified on the drawing, if known.

Sheet C2.0

6. Specify the distance between bollards for ADA access to the storefront walkway, ensuring sufficient spacing to allow for wheelchair passage.

Sheet C3.0

7. Provide the vertical crossing elevations for all proposed utility crossings.
8. The proposed 42 LF 12" RCP storm sewer when measured is only 16 LF. This typo should be revised to the correct length.
9. The slope for the 58 LF RCP storm sewer is calculated to be 0.78% instead of 0.74%. Verify and revise accordingly.
10. The slope for the 134 LF RCP storm sewer is calculated to be 0.37% instead of 0.45%. Verify and revise accordingly.
11. Provide the proposed rim and invert elevations, the proposed slopes, and connect invert to the proposed 18" storm sewer.
12. We note that an existing telecommunications line is located within the footprint of the proposed underground storage tanks and will likely need to be removed and relocated.
13. Callout the relocated water service from the connection point to the building. Also provide the material and size of the water service.

Sheet C4-0

14. Provide grading cross-section details of the ADA parking stall and the accessible route to the entrance, ensuring full ADA compliance.
15. The proposed 727 contour at the southern entrance along S. Cass Avenue should end at the back of the curb. The contour also extends beyond the existing 727 contour within the grass area south of the entrance, disrupting the existing 726 and 725 contours. The grading in this area must be revised accordingly to allow adequate drainage.
16. Provide details regarding the trickle channel and proposed grades along the channel.
17. The proposed contour lines at the south end of the detention pond are missing their elevation callout.
18. The proposed 727 contour line shown passing through the building shall terminate at the building's edge.
19. The proposed 726.76 spot elevation appears to have a typo, the elevation would create a high point, disrupting the flow line towards the northeast storm inlet.

Sheet C5.0

20. The construction fencing shall be shown to block access from the joint drive to the south.
21. Provide silt fencing or a ditch check within the proposed detention basins near the south inflow and outflow culvert.
22. If soil stockpiles will be utilized, then a location shall be specified.
23. The site's portable toilet location shall be specified.

General Comments

24. Provide manufacturer details for the proposed 6' Dia restrictor manhole specifying elevations and flow rates.
25. We note that the only lighting proposed consists of the existing fixtures and those associated with the gas pump canopy. If additional lighting is to be proposed, it shall be depicted on the plans and a photometric plan shall be added to the plan set.

26. Provide details regarding the proposed retaining wall with structural calculations.
27. An oil and grease interceptor shall be considered before stormwater enters the restrictor or detention basins as “good practice”.
28. The Preliminary Stormwater Narrative indicates that the proposed net new impervious area is approximately 6340 SF. The stormwater ordinance requires Best Management Practices (BMPs) for all new impervious areas if the net new impervious area is 2500 SF or greater. This can be addressed in the final stormwater report.

If you have any questions, please contact me.

Sincerely,

Daniel L. Lynch, PE, CFM
Vice President, Head Municipal Engineering Department

Cc Dan Gombac, City of Darien

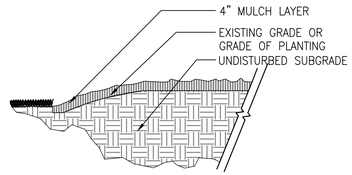
SCALE: 1/2"=1'-0" DT-plantspace-gyn

NOTES:
1. TRENCH EDGE DETAIL SHALL BE USED AT ALL LAWN EDGES AND AT EDGES OF MULCHED AREAS (FOR CONTAINMENT)
2. TRENCH EDGE SHALL CREATE A CLEAN SEPARATION BETWEEN AREAS, AND SHALL CREATE SMOOTH AND EVEN LINES (AS INDICATED ON PLANS)



TRENCH EDGE DETAIL

SCALE: 1"=1'-0" DT-ls-trench-gyn

1. THE LANDSCAPE CONTRACTOR SHALL BE RESPONSIBLE FOR MAKING HIMSELF FAMILIAR WITH ALL UNDERGROUND UTILITIES AND STRUCTURES. SEE CONSTRUCTION NOTES.

2. DO NOT WILLFULLY PROCEED WITH PLANTINGS AS DESIGNED WHEN IT IS OBVIOUS THAT OBSTRUCTIONS AND/OR GRADE DIFFERENCES EXIST THAT MAY NOT HAVE BEEN KNOWN DURING THE DESIGN PROCESS. SUCH CONDITIONS SHALL BE IMMEDIATELY BROUGHT TO THE ATTENTION OF THE PROJECT MANAGER. THE LANDSCAPE CONTRACTOR WILL BE HELD RESPONSIBLE FOR ANY NECESSARY REVISIONS AND COSTS DUE TO FAILURE TO GIVE SUCH NOTIFICATION.

3. THE LANDSCAPE CONTRACTOR SHALL BE RESPONSIBLE FOR ANY COORDINATION WITH SUBCONTRACTORS AND/OR SUPPLIERS AS REQUIRED TO ACCOMPLISH PLANTING OPERATIONS.

4. THE LANDSCAPE CONTRACTOR IS TO RECEIVE THE SITE AT +/- 1/10TH OF AN INCH. THE LANDSCAPE CONTRACTOR SHALL OBTAIN A LETTER OF GRADE FROM THE GENERAL CONTRACTOR PRIOR TO BEGINNING WORK.

5. REFER TO SPECIFICATIONS FOR PLANTING REQUIREMENTS, MATERIALS, AND EXECUTION.

6. ALL TREES SHALL BE TAGGED BY THE PROJECT MANAGER AT A NURSERY SELECTED BY THE LANDSCAPE CONTRACTOR OR AT THE DISCRETION OF THE PROJECT MANAGER.

7. FINAL LOCATION OF ALL PLANT MATERIAL SHALL BE SUBJECT TO APPROVAL OF THE PROJECT MANAGER PRIOR TO DIGGING ANY HOLES. THE LANDSCAPE CONTRACTOR IS RESPONSIBLE FOR PROVIDING PROJECT MANAGER ADEQUATE ADVANCE NOTICE FOR ON-SITE APPROVALS. THE LANDSCAPE CONTRACTOR IS TO THE FOLLOWING BEFORE BEGINNING INSTALLING PLANTINGS:

SHRUBS – LAY OUT THE ACTUAL CONTAINERS ON-SITE BEFORE DIGGING HOLES.

TREES – STAKE THE LOCATIONS BEFORE DIGGING HOLES. ANY TREE PLANTED WITHOUT ITS FINAL LOCATION APPROVED BY THE PROJECT MANAGER MAY BE REQUESTED TO BE RELOCATED AT THE SOLE EXPENSE OF THE LANDSCAPE CONTRACTOR.

8. THE LANDSCAPE CONTRACTOR SHALL NOTIFY THE PROJECT MANAGER AT LEAST 48 HOURS IN ADVANCE PRIOR TO COMMENCEMENT OF WORK TO COORDINATE PROJECT OBSERVATION SCHEDULES.

9. IF CONFLICTS ARISE BETWEEN THE ACTUAL SIZE OF AREAS ON THE SITE AND THE DRAWINGS, CONTACT THE PROJECT MANAGER FOR RESOLUTION.

10. IT IS THE LANDSCAPE CONTRACTOR'S RESPONSIBILITY TO FURNISH PLANTS FREE OF PESTS AND/OR DISEASES. PRE-SELECTED OR "PROJECT MANAGER TAGGED" PLANT MATERIAL MUST BE INSPECTED BY THE LANDSCAPE CONTRACTOR AND CERTIFIED PEST AND DISEASE FREE. IT IS THE LANDSCAPE CONTRACTOR'S OBLIGATION TO WARRANTY ALL PLANT MATERIAL PER THE SPECIFICATIONS.

11. GROUNDCOVERS AND SHRUBS ARE TO BE TRIANGULARLY SPACED UNLESS INDICATED ON THE PLANS.

12. ALL TREES WITHIN A SPECIES SHALL HAVE MATCHING FORM, UNLESS OTHERWISE NOTED.

13. ALL TREES, SHRUB AND GROUNDCOVER AREAS (EXCLUDING TURF AND SLOPE AREAS) ARE TO BE MULCHED PER DETAILS.

14. ALL MULCH TO BE DOUBLE SHREDDED HARDWOOD MULCH, BROWN IN COLOR MINIMUM 4" THICK.

15. TREES SHALL BE SET BACK A MINIMUM OF TEN FEET (10') HORIZONTALLY FROM UTILITY STRUCTURES, INCLUDING, BUT NOT LIMITED TO, MANHOLES, VALVE VAULTS, VALVE BOXES, FIRE HYDRANTS, TRANSFORMERS AND SWITCH CANS. TREES SHALL BE SET BACK A MINIMUM OF FIVE (5') HORIZONTALLY FROM SANITARY SEWER AND WATER SERVICES. CONTRACTOR TO MAKE NECESSARY ADJUSTMENTS UNDER THE APPROVAL OF OWNER.

16. PLANTING RESTRICTIONS: PLANT DURING ONE OF THE FOLLOWING PERIODS. COORDINATE PLANTING PERIODS WITH MAINTENANCE PERIODS TO PROVIDE REQUIRED MAINTENANCE FROM DATE OF SUBSTANTIAL COMPLETION.

1. SPRING PLANTING: 5/1 – 6/15
2. FALL PLANTING: 9/15 – 12/1

RE: 8226 Cass Avenue – BP Gas Stations Renovation
Zoning Variation Justification Narrative

Dear Mr. Murphy,

Thank you for providing clarity and information regarding the zoning review process. On behalf of True North Energy LLC. We have prepared a justification narrative of zoning variation requests for the proposed renovation of the fueling station and car wash on the subject property.

The intent of the owner is to perform a full tear down and renovation of the property which includes a new servicing island and canopy for six pumps and a new convenience storefront that is a hallmark of True North's unique touch to the latest in fueling stations. The car wash facility will not be returned in this renovation.

The following Variances are requested from O-31-85:

General Conditions

3. No alcoholic beverages shall be sold from the facility.
Request to amend to allow Alcohol sales.

Landscaping and Fencing

1. The owner shall install an eight foot (8') high stockade-type fence along the north two-hundred twenty-five feet (225') of the western perimeter of the subject property.
Request to amend to defer to the proposed landscaping plan.

2. A fence shall be constructed along the west two-hundred forty feet (240') of the northern property line with the first two-hundred twenty feel (220') being eight feet (8') in height, and the next ten feet (10') being six feet (6') in height, with the next ten feet (10') being four feet (4'), or such other acceptable method of constructl.ng the fence as the city and shell may agree. The remaining portion of the north property line shall be landscaped with 1ow-line vegetation. However, in the event it is determined that the-eastern building line of the residence to the immediate north of the subject property is set back less than sixty feet (60') from the property line along Cass Avenue, the owner shall

extend the fence along the northern property line of the subject property so that said fence extends at least ten feet (I0') east of said building Iine.
The referenced residence to the north is no longer present. Request to amend to defer to the proposed landscape plan.

In accordance with Section 5A-2-2-3 of the City Code the new design will impact the following items of Special Use Ordinance O-31-85. **Responses will be in bold**:

Decision Criteria (See City Code Section 5A-2-2-3)

- 2a. The property in question cannot yield a reasonable return if permitted to be used only under the conditions allowed by the regulations in the zone.
  A significant component of the viability of True North's convenience stores features the sale of Alcohol. Three of the four other gas stations within Darien currently serve alcohol. A copy of True North's alcohol training and enforcement policy is also attached for your benefit. If alcohol is not permitted True North has indicated that the cost to update is not viable. Considering the site is currently a fueling station anticipated impacts would be minimal considering the use is being retained.

- 2b. The plight of the owner is due to unique circumstances.
  N/A

- 2c. The variation if granted will not alter the essential character of the locality.
  The intended use as a fueling station will remain.

- 3a. Essential Need? The owner would suffer substantial difficulty or hardship and not mere inconvenience or a decrease in financial gain if the variation is not granted.
  Regarding landscaping, the physical constraints of the site affect the density of allowable plantings to the updated ordinance. The neighboring property to the north is a detention basin. The east property is along Cass (DuDOT) and is subject to DuDOT provisions. The southern property is an access road for the banquet hall to the west. The west boundary has a fence outlined in the special use ordinance and is bounded by the detention basin. The proposed landscaping would not be visible with the fence in place. What is proposed has more density than the requirements of O-31-85.

- 3b. Problem with Property? There is a feature of the property such as slope or shape or change made to the property, which does not exist on neighboring properties, which makes it unreasonable for the owner to make the proposed improvement in compliance with the Zoning Code. Such feature or change was not made by the current owner and was not known to the current buyer at the time of purchase.
  N/A

- 3c. Smallest Solution? There is no suitable or reasonable way to redesign the proposed improvements without incurring substantial difficulty or hardship or reduce the amount of variation required to make such improvements.
  Regarding landscaping the maximum attainable density is provided on the plan. Additional efforts would have impacts on the engineering design elements of the site

and could potentially alter the number of pumps available for use. This in turn would affect the financial feasibility of the project.

- 3d. Create Neighbor Problem? The variation, if granted, will not cause a substantial difficulty, undue hardship, unreasonable burden, or loss of value to the neighboring properties.
  With regard to landscaping and the removal of the car wash this design would be an improvement along neighboring properties that would be a benefit.

- 3e. Create Community Problem? The variation, if granted, may result in the same or similar requests from other property owners within the community, but will not cause an unreasonable burden or undesirable result within the community.
  N/A

- 3f. Net Benefit? The positive impacts to the community outweigh the negative impacts.
  The new aesthetic features of the convenience store, landscaping, and improved stormwater storage would be an improvement to the area. In addition, the removal of the car wash would also benefit with less noise.

- 3g. Sacrifice Basic Protections? The variation, if granted, will comply with the purposes and intent of the Zoning Code set forth in Section 5A-1-2(A) and summarized as follows; to lessen congestion, to avoid overcrowding, to prevent blight, to facilitate public services, to conserve land values, to protect from incompatible uses, to avoid nuisances, to enhance aesthetic values, to ensure an adequate supply of light and air, and to protect public health, safety, and welfare.
  It is our position that the proposed variations meet the intent of the Zoning Code.

We appreciate your time and consideration in reviewing the enclosed documents. Please do not hesitate to contact us with any additional questions or concerns you may have.

Sincerely,
RTM Engineering Consultants, LLC.

Christopher J. Palmer, P.E. – Senior Civil Engineer

Special Use and Variation Criteria

The criteria that the Planning, Zoning and Economic Development Commission and City Council must consider when acting on a request for a Special Use and Variation are included below.

Special Use Criteria:
No special use shall be recommended to the City Council by the Plan Commission, nor approved by the City Council, unless findings of fact have been made on those of the following factors which relate to the special use being sought:

1. *That the special use is deemed necessary for the public convenience at the location specified.*
2. *That the establishment, maintenance, or operation of the special use will not be detrimental to, or endanger the public health, safety, or general welfare.*
3. *That the special use will not be injurious to the use and enjoyment of other property in the immediate vicinity for the purposes already permitted, nor substantially diminish and impair property values within the neighborhood.*
4. *That the establishment of the special use will not impede the normal and orderly development and improvement of the surrounding property for uses permitted in the district.*
5. *That the exterior architectural design, landscape treatment, and functional plan of any proposed structure will not be at variation with either the exterior architectural design, landscape treatment, and functional plan of the structures already constructed or in the course of construction in the immediate neighborhood or the character of the applicable district, as to cause a substantial depreciation in the property values within the neighborhood.*
6. *That adequate utilities, access roads, drainage, and/or necessary facilities have been or are being provided.*
7. *That adequate measures have been or will be taken to provide ingress and egress so designed as to minimize traffic congestion in the public streets.*
8. *That the special use shall, in all other respects, conform to the applicable regulations of the district in which it is located, except as such regulations may, in each instance, be modified by the City Council pursuant to the recommendations of the Plan Commission and Planning and Development Committee.*

Variation Criteria:
The City may grant variations based on the finding-of-fact that supports the following criteria outlined below by the City to be the most relevant to the subject property situation.

a) *The property in question cannot yield a reasonable return if permitted to be used only under the conditions allowed by the regulations in the zone.*
b) *The plight of the owner is due to unique circumstances.*
c) *The variation if granted will not alter the essential character of the locality.*
d) *Essential Need: The owner would suffer substantial difficulty or hardship and not mere inconvenience or a decrease in financial gain if the variation is not granted.*
e) *Problem with Property: There is a feature of the property such as slope or shape or change made to the property, which does not exist on neighboring properties, which makes it unreasonable for the owner to make the proposed improvement in compliance with this*

title. Such feature or change was not made by the current owner and was not known to the current buyer at the time of purchase.

f) *Smallest Solution: There is no suitable or reasonable way to redesign the proposed improvements without incurring substantial difficulty or hardship or reduce the amount of variation required to make such improvements.*

g) *Create Neighbor Problem: The variation, if granted, will not cause a substantial difficulty, undue hardship, unreasonable burden, or loss of value to the neighboring properties.*

h) *Create Community Problem: The variation, if granted, may result in the same or similar requests from other property owners within the community, but will not cause an unreasonable burden or undesirable result within the community.*

i) *Net Benefit: The positive impacts to the community outweigh the negative impacts.*

j) *Sacrifice Basic Protections: The variation, if granted, will comply with the purposes and intent of this title set forth in subsection 5A-1-2(A) of this title and summarized as follows: to lessen congestion, to avoid overcrowding, to prevent blight, to facilitate public services, to conserve land values, to protect from incompatible uses, to avoid nuisances, to enhance aesthetic values, to ensure an adequate supply of light and air, and to protect public health, safety, and welfare.*

AGENDA MEMO
PLANNING, ZONING AND ECONOMIC DEVELOPMENT COMMISSION
MARCH 5, 2025

CASE
PZC2025-02 Short-Term Rentals – Zoning Text Amendment

ISSUE STATEMENT
Petition from the City of Darien to amend Title 5A (Zoning Regulations) to add "the offering of a short-term rental" as a prohibited action under the existing short-term rental prohibition contained in Section 5A-5-16 of the City Code.

ATTACHMENTS
1) **PROPOSED ORDINANCE REVISIONS (SHORT-TERM RENTALS)**

BACKGROUND/OVERVIEW
On June 19, 2023, the City Council adopted Ordinance No. O-11-23, defining "Short-Term Rentals" as a rental period of less than 30 consecutive days, and prohibiting them in all zones throughout the City.

While the City has had success in enforcing the ordinance, additional clarification is needed in the Code so that the City can adequately and comprehensively enforce the prohibition on short-term rentals, including the *offering* of short-term rentals. This will allow the City to compel property owners to remove listings of short-term rentals, as defined, on websites such as Airbnb, VRBO, etc. and aid the City in receiving compliance from property owners who may claim that they did not actually book a short-term rental, but rather only had offered a short-term rental, thereby avoiding enforcement action.

Attached to this memo are the proposed ordinance revisions, which includes the established definition of a short-term rental, and shows the added prohibited activity of offering a short-term rental.

DECISION MODE
The Planning and Zoning Commission will consider this item at its meeting on March 5, 2025.

MEETING SCHEDULE

Planning and Zoning Commission	March 5, 2025
Municipal Services Committee	March 24, 2025
City Council	April 7, 2025

PROPOSED ORDINANCE REVISIONS

(Red text = added text; ~~Strikethrough text~~ = deleted text)

5A-5-16: SHORT-TERM RENTALS PROHIBITED:

(A) Short-Term Rentals are prohibited in the City of Darien.

(B) The offering of a Short-Term Rental in the City of Darien is prohibited.

~~(B)~~(C) The prohibition on short-term rental units shall not apply when the immediately preceding owner of a property maintains possession of the dwelling unit after closing on a real estate transaction for the sale thereof and leases said property back from the successor owner for a period of time pursuant to a written agreement.

~~(C)~~(D) Any person who violates, disobeys, omits, neglects, or refuses to comply with, or who resists enforcement of any provisions of this section, shall be subject to a fine of not less than one thousand dollars ($1,000.00) nor more than two thousand five hundred dollars ($2,500.00) for each offense. A separate offense shall be deemed committed on each day that such violation occurs or continues.

~~(D)~~(E) The owner or tenant of any building, structure, or land, and any other person, who commits, participates assists in, or maintains such violation may each be found guilty of a separate offense and be subject to the penalties herein provided.

MINUTES CITY OF DARIEN

PLANNING, ZONING, AND ECONOMIC DEVELOPMENT COMMISSION

Wednesday, February 5, 2025

PRESENT: Lou Mallers – Chairperson, Jonathan Christ, Chris Jackson, Chris Green, Mark Kazich, Jonathan Johnson

ABSENT: Shari GIllespie

OTHERS: Ryan Murphy - City Planner

Chairperson Lou Mallers called the meeting to order at 7:01 p.m. at the Darien Police Department Training Room, 1710 Plainfield Road, Darien, Illinois. Chairperson Mallers declared a quorum present.

Regular Meeting – New Business

a. **PZC2025-01 – 7409 Cass Avenue – Indvestia Darien, LLC – A petition for a one-year extension of time for a special use permit and variations for the construction of a quick service drive-through eating establishment offering retail food items for consumption. The Property is located within the B-2 Community Shopping Center Business District.**

Mr. Ryan Murphy, City Planner reported that the petitioner was a requesting one-year time extension for a drive through eating establishment located at 7409 Cass Avenue that was approved in 2024. He reported that the plat of subdivision that was approved did not expire but that the special use and variations would expire if a time extension is not granted. He reported that the building would be located next to the Jewel-Osco shopping center. He reported the Planning and Zoning Commission would need to evaluate whether or not site conditions have changed and that there are various criteria for a time extension that would have to be met.

Commissioner Christopher Jackson recused himself from the meeting, stating that he was representing the petitioner for this application. Chairperson Lou Mallers swore in Christopher Jackson as a member of the public wishing to present public testimony.

The Petitioner's representative, architect Christopher Jackson, stated that application was an extension of time for a previously approved project. He described the property being separate from the Jewel shopping center. He described the two actions the petitioner previously got approved, a lot line revision, and a special use permit for the drive-through with zoning variations necessitated by the parcel lines and site plan.

Mr. Murphy confirmed the variations were included with the current application.

Mr. Jackson stated that the petitioner intended for a future tenant to build the building to-suit, and that while there is interest in the site, more time is needed to secure a tenant. He stated that building it without a tenant would be expensive, and residents wouldn't want it. He shared with the Commission that with the recent closing of the 25,000-square foot American Freight store, filling that space has become the priority. He disclosed that he was a minority owner in the property, and that the owner had Mid-America Real Estate to manage the leasing of the property.

Chairman Mallers asked Mr. Jackson if he said he was a part owner of the property, and questioned if eating inside the establishment will be permitted, or if there were conditions in the approved ordinance that prohibited indoor dining.

Mr. Jackson said he believed that was true and sought clarification from Mr. Murphy.

Mr. Murphy stated that the condition read "the building shall only be used as an eating establishment in conjunction with the drive-through facility" and clarified that it did not appear to restrict indoor dining.

There was some discussion about parking and drive aisle configuration.

Chairman Mallers stated that will be interesting to see what happens with the site now that the American Freight building will see a new tenant. There was some discussion about leasing efforts.

Commissioner Johnson stated that there were plenty of access points throughout the site.

Mr. Jackson described how a traffic report was previously prepared by V3 for the project and found no impacts. He stated that the variation was also approved to reduce the stacking in the drive through lane.

There was some discussion about vehicle ingress/egress and site design.

Mr. Jackson stated that the original application included a traffic memo from V3 which supported the development and analyzed reduced vehicle stacking in the drive-through.

Commissioner Johnson and Mr. Jackson discussed vehicle circulation on site. Mr. Jackson recalled that additional wayfinding was a condition required in the previous approval.

There was discussion about the length of the time extension. Mr. Murphy explained that the project will be granted an extension of one year from the date of the approval, which is anticipated to be heard at Council on March 3, 2025.

Mr. Jackson provided an explanation on how the need for a time extension was identified.

Chairman Mallers asked if starting construction within the next 12 months would eliminate the need for further extensions. Mr. Murphy stated that most commonly, pulling the building permit eliminates the need for further time extensions.

There was discussion regarding timing of plan review and construction.

Commissioner Kazich asked if there were any tenants for the building. He questioned if the City has a role in approving the future tenant. Mr. Jackson and Mr. Murphy stated that as long as they were a food/beverage retailer, they would be by-right occupants. Mr. Murphy also clarified that if there were site plan changes or other land use changes, an amendment to the Special Use would be required.

There was a discussion regarding businesses that might have staff serve food and beverages in scant attire. Mr. Jackson and Mr. Murphy stated that as long as they weren't adult entertainment businesses and operated legally, there would be no separate approval.

There was discussion regarding prohibited signage.

There was discussion reading the land use identified in the traffic study.

Commissioner Christ discussed the location of the property and the site layout.

Chairman Mallers closed the public hearing and opened the discussion for the Commission. There were no further comments.

Commissioner Johnson made a motion, seconded by Commissioner Green, to approve PZC2025-01 – 7409 Cass Avenue – Indvestia Darien, LLC – A petition for a one-year extension of time for a special use permit and variations for the construction of a quick service drive-through eating establishment offering retail food items for consumption.

Upon roll call vote, the MOTION PASSED UNANIMOUSLY 5-0.

AYES: Kazich, Johnson, Green, Christ, Mallers

NAYS: None

Mr. Murphy reported that this item would be heard next at both the Municipal Services Committee and City Council on the evening of March 3, 2025.

The Commission had a short discussion regarding how long it make take to secure a tenant and construct the project.

<u>Regular Meeting</u> – Old Business

a. <u>PZC2024-15</u>

1005 75th Street – Basia Janke c/o Smoke Bank – A request for a Special Use Amendment request pursuant to Section 5A-8-3-4 of the Zoning Ordinance. The petition specifically requests to amend a Special Use Permit for a drive-through Tobacco Shop/Food Store to allow additional signage consisting of a small electronic display/menu sign proposed to be mounted in the drive-through window. The Property is located within the B-2 Community Shopping Center Business District.

Mr. Murphy reported the results of the February 2, 2025 PZC meeting, stating that the application was continued by the Commission to the present meeting in order to give the applicant more time to address questions and concerns raised by the Commission. He reported that on February 3, the applicant withdrew their application and that a withdrawal memo was provided to the Commission in separate correspondence.

Chairman Mallers mentioned that at the last meeting there appeared to be lots of questions the petitioner was unprepared to answer. He reiterated his previous concern that the sign would take up a lot of window space and be very visible from the roadway.

Commissioner Johnson stated that the location is in an area with heavy traffic and appeared to him to be very visible from the roadway.

Commissioner Jackson stated that the concerns were valid under the Special Use Criteria, and that the opportunity to address their concerns was given.

Mr. Murphy stated that the petitioner was informed of the Commission's specified concerns but that the petitioner had no interest in continuing the application.

Staff Updates & Correspondence

Mr. Murphy reported an update regarding the Chestnut Court project and the Council's presentation on tax increment financing. He reported that the City put out an RFP to develop a TIF. He further reported that he would give a Chestnut Court update with a preliminary plat and overview of the proposal, and that learning resources for TIFs would be provided to the Commission.

Mr. Murphy reported that a public hearing will be held at the next meeting to update the short term rental prohibition to include the "offering" of a short term rental. A description of the existing prohibition was reported to the Commission.

Mr. Murphy reported that apartments located at 2305 Sokol Court submitted a request for a Minor Planned Unit Development Amendment to convert the two model units in the building, which will be heard by the Municipal Services Committee and City Council. He clarified that because it was a minor change, it did not need to go to the PZC again. He reported that the building had a high occupancy rate.

Mr. Murphy reported that Westwood Park may be improved with an outdoor concert pavilion, which would require PZC approval. He mentioned that the project was grant funded and the project depended on that funding.

Mr. Murphy reported that at the next meeting, a Special Use Permit amendment will be heard for the Shell Gas Station on South Cass Avenue to demolish the existing carwash and remodel the site with a new mini-mart. He reported that a request for an alcohol license was also submitted that would be considered by the City Council separately.

Mr. Murphy reported that there was legislation being considered at the state level to eliminate single-family zoning to allow for duplexes in all single family zones. He mentioned that staff will track the progress of the any pending legislation and report updates to the Commission.

Approval of Minutes

Commissioner Jackson made a motion, and it was seconded by Commissioner Johnson to approve the February 5, 2025 Regular Meeting Minutes, with a correction to the spelling of KLOA, which was previously spelled CLOA in the draft minutes.

Upon voice vote, the MOTION PASSED UNANIMOUSLY 6-0.

AYES: Kazich, Johnson, Green, Christ, Mallers, Jackson

ABSTAINS: None

Next Meeting

Mr. Ryan Murphy announced that the next meeting is scheduled for Wednesday, March 5, 2025 in the Police Department Training Room at 1710 Plainfield Road.

Public Comments (On Any Topic Related to Planning and Zoning)

There was no one in the audience wishing to present public comment.

Adjournment

With no further business before the Commission, the meeting adjourned at 7:54 p.m.
